*The Glitches within the Human Race* Stuart Miller,2022-01-05 I provide a deep analytical and philosophical explanation of why certain cultural and social issues exist With each topic I discuss what it is give examples for each and break down each example providing more detail of just some of the possible reasons as to why people do them possible mentalities I also provide some of my own experiences and everything discussed in this book I have personally witnessed and or have gone thru I included the following Situations based on personal experience and or witnessing them with some online research to support certain issues My perception perspective and mentality on various issues that affects everyone to some degree Quotes that further support certain chapter topics Philosophies analogies and comparisons to provide better contextual clarification on certain issues Detailed breakdown of the examples provided within each chapter Explanation of what it will take to help fix each of these issues Some of the many possible reasons why people behave the way they do and some of the possible motives intentions and life experiences from both sides person doing the behavior and the person receiving the treatment Solutions to all the topics that are discussed changes that we need to make with how we think and act towards others Furthermore I provide much thought provoking material to challenge the way we think and view society in ways you might not have considered I discuss many unhealthy mentalities and behaviors which is damaging to people on a much larger

scale and it's having a much greater influence on others both directly and indirectly in ways that we do not even realize. This book is something the whole world needs to read and here is why: Providing solutions to some of the biggest cultural and social issues which have existed for far too long. The way the world is with how we treat others is badly broken and some of the solutions are in this book which the world needs. The solutions I provide We do the same or similar behaviors towards others expecting different results and this is not working at all. We need to step outside our comfort zone by changing their behaviors in ways we're not used to doing to get something you've never had. You must first do something that you've never done. The world needs to be less close minded and use less tunnel vision. The mind is like a parachute; it can't work if it's not opened. I see the world differently and the purpose of this book is to share different ways of looking at situations and the numerous possibilities to take into consideration. I share my perception and perspective viewpoint mentality and some of my own philosophies. I provide a more in-depth perspective of looking at a variety of life situations and the possible reasons as to why people choose to treat others the way they do. I think a lot of people might find this content in general interesting, beneficial, inspiring and/or even life-changing.

### **Value Realization in the Phygital Reality Market**

Lin Huang, Biao Gao, Mengjia Gao, 2023-08-09

This book is a timely and much-needed comprehensive compilation that reflects the development of research on consumption and communication in the conflation of the real and digital worlds, bringing together the current state of thinking about the phygital reality market and the cutting-edge challenges that are involved. In this book, the term phygital reality market is used, implying that the physical, digital, and virtual realms are fused into one to recognize and understand the market with multiple or mixed realities. The concept of the phygital reality market captures the new realities that consumers are shopping, consuming, and living in, and companies are competing within the physical, digital, and virtual marketplaces. The book covers the research on consumption, service, and communication in the phygital reality market and compiles the current state of thinking, challenges, and cases having to do with the acceptance and diffusion of new technologies of phygital reality. The interest in the phygital reality market, such as omnichannel retailing integrating physical stores and online services, has grown hugely over the last two decades, particularly since the coronavirus pandemic COVID triggered severe social and economic disruption around the world but has accelerated the acceptance and diffusion of new technologies in the phygital reality market where the physical, digital, and virtual worlds are conflated. Versatile problem solving and new challenges are reflected in the value realization process of innovation; in other words, widespread acceptance and diffusion of devices or services that embody new technologies. The excitement and hype associated with the metaverse have highlighted the need to understand the creation and adoption of new technologies in consumption and marketing, recognition of the foundational role of new technologies in driving consumer behavior, and marketing theory and practice in value realization as a vital part of the process of digital transformation.
