Startup Finance 2.0 Sam Ghosh, 2025-08-29 Traditional corporate financial theories and tools are based on matured companies with the assumption that the companies are going concerns Going Concern refers to the assumption that a company will continue to operate indefinitely with no intention or necessity of liquidation or cessation of operations in the foreseeable future The problem is that the Going Concern assumption does not hold for startups due to the inherent uncertainty associated with startups Traditional financial education and resources usually meant for analysts and accountants aren't ideal for entrepreneurs They focus on analyzing past data from established businesses not on making forward looking decisions in the uncertain and highly dynamic environment of startups Entrepreneurs also often struggle to prioritize the allocation of resources between seemingly urgent matters and matters that are important for the long term value of the startup Thus this book takes a value oriented approach to startup finance The book is designed to build the financial intuition that an entrepreneur needs to prioritize matters vital for the long term value of the company raise capital and allocate capital for value maximization It also looks at finance from a value creation point of view and covers specific methods especially suited for startups from investment assessment to valuation to fundraising to managing day to day finances

Gamifying the Music Classroom Andrew Lesser, 2024 Digital games often referred to as video games have the potential to act as effective educational resources in the teaching of musical concepts and skills This book will serve as an introduction to how digital games can be used in educational contexts for in service and pre service school music teachers and show how to successfully use digital games to create perform respond to and connect musical content in a way that is engaging and relevant for students Specific examples of over 40 digital games are included in lesson plan outlines that along with connections to educational objectives and National Core Arts Standards are designed to be implemented in multiple classroom technology environments Gamifying the Music Classroom Digital Tools for Practical Application will showcase digital game based learning technology as valuable tools not only to produce new innovative ways to teach music but to create meaningful experiences for all students
