Directions: Read about cats and dogs. Then, complete the Venn diagram, telling how they are the same and different.

Cats and dogs are popular pets. Both cats and dogs have fur, and they need food and water every day. Cats are usually quiet and like to climb, while dogs often bark and enjoy running outside. Cats clean themselves by licking their fur, but dogs need people to give them baths. Dogs love being with people all the time, while cats can be left alone for longer periods.

Disciplinary Literacy Connections to Popular Culture in K-12 Settings Haas, Leslie, Tussey, Jill, 2020-11-13

Literacy and popular culture are intrinsically linked as forms of communication entertainment and education. Students are motivated to engage with popular culture through a myriad of mediums for a variety of purposes. Utilizing popular culture to bridge literacy concepts across content areas in K-12 settings offers a level playing field across student groups and grade levels. As concepts around traditional literacy education evolve and become more culturally responsive, the connections between popular culture and disciplinary literacy must be explored. *Disciplinary Literacy Connections to Popular Culture in K-12 Settings* is an essential publication that explores a conceptual framework around pedagogical connections to popular culture. While highlighting a broad range of topics including academic creativity, interdisciplinary storytelling, and skill development, this book is ideally designed for educators, curriculum developers, instructional designers, administrative officials, policymakers, researchers, academicians, and students.

Applied Quantitative Analysis in Education and the Social Sciences Yaacov M. Petscher, Christopher Schatschneider, Donald L. Compton, 2013. To say that complex data analyses are ubiquitous in the education and social sciences might be an understatement. Funding agencies and peer review journals alike require that researchers use the most appropriate models and methods for explaining phenomena. Univariate and multivariate data structures often require the application of more rigorous methods than basic correlational or analysis of variance models. Additionally, though a vast set of resources may exist on how to run analysis, difficulties may be encountered when explicit direction is not provided as to how one should run a model and interpret results. The mission of this book is to expose the reader to advanced quantitative methods as it pertains to individual level analysis, multilevel analysis, item level analysis, and covariance structure analysis. Each chapter is self-contained and follows a common format so that readers can run the analysis and correctly interpret the output for reporting.

Task-based pair and small group activities give maximum practice and ample opportunities for personalization. Realistic task-based speaking, listening, reading, and writing activities reinforce grammar and vocabulary. High interest cross-cultural topics provide a context for meaningful language learning.
