Virtual Production Mark Sawicki, Juniko Moody, 2025-06-30 This book written by industry experts provides a comprehensive understanding of virtual production processes, concepts, and technology, helping readers get to grips with this nascent technology. Topics covered are the history of virtual production, underlying technologies, creative potential, and production workflows. In addition, it delivers a detailed overview of the virtual production pipeline from pre-production planning to post-production finishing. Each chapter explains specific aspects of virtual production such as real-time rendering, motion capture, virtual cameras, LED screens, game engines, and collaborative workflows. Additionally, the book examines virtual production's ethical and cultural implications, including the impact on actors, the representation of diverse voices, and the democratization of filmmaking. Whether you're a student, teacher, or industry professional, *Virtual Production* will provide you with a solid foundation for comprehending the fundamental concepts behind a constantly evolving and intricate process.

Field & Stream, 1970-06 **FIELD STREAM** America's largest outdoor sports magazine celebrates the outdoor experience with great stories, compelling photography, and sound advice while honoring the traditions hunters and fishermen have passed down for generations. *Media Industries in the Digital Age* Amanda D. Lotz, Timothy Havens, 2024-11-18 The digital communication technologies that emerged at the turn of the century have profoundly disrupted long-practiced norms of nearly every media industry. In particular, internet distribution has fundamentally changed the foundation of the media industry to enable the emergence of new sectors while posing a challenge for others. *Media Industries in the Digital Age* reframes our understanding of media businesses in the light of these substantial changes. To develop an integrated understanding of media industries today, the book foregrounds the different funding sources that are now common. It begins by mapping the foundations and developments of media industry operation and exploring all forms of advertiser-funded and consumer-funded media to identify connections across sectors, including digital and legacy media. The final section grounds the book's conceptual work in examples of media making to explore how some old media have successfully adapted to internet disruption and the differences and similarities of media making outside of corporations. Looking to the future, the book anticipates implications for the emerging metaverse media experiences and the key issues generative AI poses to the sector. Ultimately, the book argues that the contemporary differences in media industry operation vary by sector but meaningful patterns can be identified by considering how advertiser, consumer, or government funding sets different priorities. Offering a new and original way of understanding the media industries today, this book is an enlightening reading for students and scholars of media studies and media industries as well as global industry professionals.

Forest and Stream, 1897 *Artificial Intelligence in Animal Behaviour, Veterinary Behaviour and Neurology* Holger Andreas Volk, Jasmin Nicole Nessler, Anna Zamansky, Sebastian Meller, Annika Bremhorst, 2025-08-18 The new leap innovation Artificial Intelligence AI will significantly accelerate the speed of science and translate into clinical practice faster than

clinicians ever have been used to Machine and deep learning techniques are now readily available to analyze large and complex data sets providing veterinary scientists with a tool to not only better understand complex behaviour traits and neurological conditions but also to delve into the nuances of animal behaviour itself AI can now write plausible sounding text recognize written or spoken human words recognize objects in images or analyze large amounts of data Different fields of applications are known so far such as improving and speeding up interpretation of radiologic findings interpretation of electroencephalography diagnosis of autism in children objectifying ataxia in dogs detecting pain in cats and assessing and characterizing animal behaviours across species At the time of writing more than 500 AI based algorithms have been approved by the FDA for human medicine most of which are used in radiology and neurology In veterinary neurology and animal behavioural science only a limited amount of research on AI has been done so far Most algorithms presented are merely fragments of usable programs and are not suitable for clinical application Therefore ready to use applications are rare yet essential for implementing AI into everyday routine diagnostic work ups scientific research and animal behavioural assessments The research topic will help to unite current efforts and provide a collection of articles to address some of the current scientific and behavioural gaps In the future a clinician might have a clinical decision support tool that generates accurate estimations of likely outcomes of neurological disease and animal behaviour combining anamnestic behavioural clinical clinical pathology and imaging information We are interested in original research systematic reviews and opinion papers not only about the scope and potential of AI for Veterinary Behavior and Neurology but also about the intersection of AI with the study of animal behaviour ethical considerations and pitfalls that the development of AI generated tools could present Potential themes therefore include but are not limited to AI to recognize monitor diagnose or characterise behaviour neurological deficits or conditions including a detailed analysis of animal behaviour across a variety of contexts and species AI to assess behavioural states in both clinical and natural environments AI to interpret scientific clinical data sets such as clinical pathology omics imaging EEG data and behaviour metrics Ethical and legal considerations when applying or using AI tools in the study of animal behaviour and veterinary medicine Potential of AI to enhance clinical practice in veterinary behavioural medicine veterinary neurology and animal behaviour research Potential of AI enhanced diagnostic and behavioural assessment tools with animals *U.S. News & World Report* ,2002 **Minority Rights and Liberal Democratic Insecurities** Anna-Mária Bíró,Dwight Newman,2022-11-11 This book addresses the impact of a range of destabilising issues on minority rights in Europe and North America This collection stems from the fact that liberal democracy did not bring about the end of history but rather that the transatlantic region of Europe and North America has encountered a new era of instability particularly since the global financial crisis The transatlantic region may have appeared to be entering a period of stability but terrorist attacks on the soil of Euro Atlantic states the financial crisis itself and other changes including mass migration the rise of populism changes in fundamental political conceptions technological change

and most recently the Covid pandemic have brought increasing uncertainties and instabilities in existing orders. In these contexts the book investigates the resulting difficulties and opportunities for minority rights. Bringing together scholars from a range of disciplines who are engaged in work on various unstable orders the book provides a unique and largely neglected perspective on present developments as well as addressing the pressing issue of the future of the minority rights regime at global, regional and national levels. This book will appeal to those with interests in minority rights, human rights, nationalism, law and politics.
