Cop Shows Roger Sabin, Ronald Wilson, Linda Speidel, 2015-03-23 From cops who are paragons of virtue to cops who are as bad as the bad guys from surly loners to upbeat partners from detectives who pursue painstaking investigation to loose cannons who just want to kick down the door the heroes and anti heroes of TV police dramas are part of who we are They enter our living rooms and tell us tall tales about the social contract that exists between the citizen and the police Love them or loathe them according to the ratings we love them they serve a function They've entertained informed and sometimes infuriated audiences for more than 60 years This book examines Dragnet Highway Patrol Naked City The Untouchables The F B I Columbo Hawaii Five O Kojak Starsky Hutch Hill Street Blues Cagney Lacey Miami Vice Law Order Homicide Life on the Street NYPD Blue CSI The Shield The Wire and Justified It's time to take another look at the perps the vics and the boys and girls in blue and ask how their representation intersects with questions of class gender sexuality and race What is their socio cultural agenda What is their relation to genre and televisuality And why is it that when a TV cop gives a witness his card and says call me that witness always ends up on a slab

Stream Ciphers Andreas Klein, 2013-04-08 In cryptography ciphers is the technical term for encryption and decryption algorithms They are an important sub family that features high speed and easy implementation and are an essential part of wireless internet and mobile phones Unlike block ciphers stream ciphers work on single bits or single words and need to maintain an internal state to change the cipher at each step Typically stream ciphers can reach higher speeds than block ciphers but they can be more vulnerable to attack Here mathematics comes into play Number theory algebra and statistics are the key to a better understanding of stream ciphers and essential for an informed decision on their safety Since the theory is less developed stream ciphers are often skipped in books on cryptography This book fills this gap It covers the mathematics of stream ciphers and its history and also discusses many modern examples and their robustness against attacks Part I covers linear feedback shift registers non linear combinations of LFSRs algebraic attacks and irregular clocked shift registers Part II studies some special ciphers including the security of mobile phones RC4 and related ciphers the eStream project and the blum blum shub generator and related ciphers Stream Ciphers requires basic knowledge of algebra and linear algebra combinatorics and probability theory and programming Appendices in Part III help the reader with the more complicated subjects and provides the mathematical background needed It covers for example complexity number theory finite fields statistics combinatorics Stream Ciphers concludes with exercises and solutions and is directed towards advanced undergraduate and graduate students in mathematics and computer science
