More than 100 experts including scientists, administrators and funders from a wide range of disciplines and professions explain evidence based principles, highlight state of the art strategies, tools and resources and share first person accounts of how they've applied them in their own successful team science initiatives. While many examples draw from cross disciplinary team science initiatives in the health domain, the handbook is designed to be useful across all areas of science. *Strategies for Team Science Success* will inspire and enable readers to embrace cross disciplinary team science by articulating its value for accelerating scientific progress and by providing practical strategies for success. Scientists, administrators, funders and others engaged in team science will also leave equipped to develop new policies and practices needed to keep pace in our rapidly changing scientific landscape.
