Software Development Fundamentals EXAM 98-361 covers Core Programming, Object-oriented Programming, General Software Development, Web Applications, Desktop Applications, Databases, Web Development Fundamentals, EXAM 98-363 covers Programming web applications, Working with data and services, Troubleshooting and debugging web applications, Working with client side scripting, Configuring and deploying web applications, Mobile Development Fundamentals EXAM 98-373 covers Work with Physical Devices, Use Data with Mobile Devices, Use a Mobile Application Development Environment, Develop Mobile Applications. These three exams have some common elements and we believe that it would be beneficial for you to study both together. We give you knowledge information relevant to the exams' specifications. To be able to succeed in the real exams, you'll need to apply your earned knowledge to the question scenarios. Many of the exam questions are written to be less straight forward. They tend to be framed within the context of short scenarios. The exams are not too difficult. However, coverage is very comprehensive; a wide range of topics are presented in the official topic lists. The exams do not ask you to answer hundreds of questions. In other words, only a small fraction of the official topics will be presented. This ExamFOCUS book focuses on the more difficult topics that will likely make a difference in exam results. The book is NOT intended to guide you through every single official topic. You should therefore use this book together with other reference books for the best possible preparation outcome.
