*Digital Trademarks and Brands* Rajeev Sachdev, 2025-10-28 Trademark disputes are a consistent feature of the digital legal landscape appearing in connection with a range of successive technologies and platforms. This book presents a new adapted model for digital trademarks and trade practices providing recommendations for the Uniform Domain Name Dispute Resolution Policy (UDRP) and extending a like process to platform trademark policies and complaint procedures including e-commerce marketplace search advertising social media mobile applications and Metaverse platforms. The proposed model addresses and greatly reduces legal uncertainties and the harm caused by problems for digital trademarks in such key areas as the following: use and place of use of marks; bad faith and abuse; confusion; unfair acts; trade practices or competition terms; policies and disclaimers; jurisdiction; territory and justification. The adapted model is informed by pertinent theories and concepts select aspects of EU and US and other legal frameworks and existing policies. Ultimately a uniform policy is recommended for each of the five platform types in line with an adapted version of the UDRP based on recommendations through the model. It is applied in a way that provides a comprehensive workable solution fostering legal certainty. Actual text for the proposed adapted UDRP as well as the uniform policies recommended for each type of platform is provided with guidance for implementation. The book provides recommendations that can greatly enhance the resolution of trademark disputes of various kinds and on various platforms in a more certain, cost effective and timely manner. Given that the complex global environment of digital trademarks raises new issues not adequately addressed by legal frameworks this book will be of inestimable value to digital platforms, e-commerce, search advertising, social media, mobile app, Metaverse, etc., website operators, platform and website lawyers, various stakeholders in the UDRP, arbitrators, panellists, online dispute resolution providers, libraries, academics and researchers. It will also be useful to digital businesses, domain name holders, sellers, listers, advertisers, content providers, digital consumers, trademark holders, digital trademark users and others.

**The Rise of Web3 and the Metaverse** Nir Kshetri, 2025-01-09 This timely book investigates the rise and fall of Web3 and the metaverse, shedding light on how various factors have influenced this trajectory. Nir Kshetri delves into the inherent complexities of the metaverse, exploring competing technologies, external influences and the reactions of investors.

**Global Perspectives on Micro-Learning and Micro-Credentials in Higher Education** Omona, Kizito, O'dama, Modest Kayi, 2024-02-27 In the rapidly evolving landscape of higher education where the acquisition of knowledge is a lifelong pursuit, educators and institutions are redefining the paradigms of learning through innovative approaches.

**Global Perspectives on Micro Learning and Micro Credentials in Higher Education** delves into the intricate tapestry of contemporary education where the convergence of advanced pedagogies and cutting edge technologies is reshaping traditional boundaries. As the realms of chatbots, gamification and hybrid learning intersect, a new era of holistic education emerges seamlessly blending theoretical prowess with experiential wisdom. The book unfurls with meticulous exploration of pivotal themes, embracing the nuanced

realms of instructional design learning analytics and library services tailored for the modern educational era. From the granular landscapes of microlearning to the macroscopic view of global teacher retention strategies the book leaves no stone unturned. This book is a symphony of intellectual rigor orchestrated to resonate with educators administrators researchers and all stakeholders vested in the future of learning

*Emerging Technologies, Novel Crimes, and Security* Hedi

Nasher, 2024-12-30 This book provides a holistic overview of the complexities of modern technological advances and their implications for crime and security. It examines the societal dilemmas that accompany these technologies their strategic impact on geopolitics governments business and civil society. The increasingly interconnected world gives rise to novel crimes and creates a new complex set of threats. Understanding this landscape is essential to strategizing for the prevention protection mitigation and risk assessment of technology related crime. Practical and approachable this book builds knowledge and awareness of the impact of emerging technologies on crime and security among professionals students academicians researchers and policymakers

**Metaverse Communication** Prasanna Bhattathiri, 2025-01-03 Metaverse Communication Redefining Connections delves into the transformative potential of the Metaverse. This book explores whether the Metaverse can truly become a space for life changing experiences and interactions surpassing the current Internet. We define the Metaverse as a shared 3D virtual space that combines elements of the digital and physical worlds. This book examines whether technology can overcome infrastructure challenges corporate greed and physical limitations to create a continuously shared virtual universe. We highlight key industry insights such as Facebook's rebranding to Meta and its significant investment in the Metaverse. With predictions like Bloomberg's estimate of an 800 billion Metaverse market by 2024 the book discusses the enormous economic and social potential of this new frontier. Metaverse Communication Redefining Connections provides a clear authoritative guide to understanding the Metaverse its applications and its implications for the future of communication and interaction

**Concepts, Technologies, Challenges, and the Future of Web 3** Lekhi, Pooja, Kaur,

Guneet, 2023-08-29 Web3 is a term which refers to the third generation of the World Wide Web it is a decentralized internet architecture that uses blockchain technology smart contracts and other decentralized technologies to create a more secure and transparent internet. Concepts Technologies Challenges and the Future of Web 3 is led by researchers with a valuable mix of industry and academic experience. The book delves into the concepts of decentralization trustlessness and interoperability and explores the challenges of Web3 including scalability security and regulatory compliance. It examines the current and potential future use cases of Web3 such as decentralized finance supply chain management identity verification and decentralized social networks. The core building blocks of Web3 is not just for researchers academics and students in computer science and related fields but also for developers entrepreneurs and businesses looking to build applications and services in the Web3 space. It offers a clear understanding of the technical and conceptual frameworks underpinning Web3 and the challenges and opportunities in the decentralized web. Moreover the book is valuable for policymakers regulators and

legal professionals interested in understanding the regulatory frameworks and legal implications of Web3 It provides insights into the potential impact of Web3 on governance regulation and law highlighting the need for new policy frameworks to address the challenges and opportunities presented by the decentralized web

### **Market-Oriented Disinformation**

**Research** Carlos Diaz Ruiz,2025-03-25 Market Oriented Disinformation Research explores the spread of false or misleading information online through the lens of marketing theory and consumer research It examines how the business models of digital platforms and advertising technology firms AdTech generate digital markets that incentivize the circulation of harmful content for profit Rather than viewing disinformation and misinformation as accidental byproducts the book proposes that they thrive in the current markets designed for digital advertising and influencer marketing Readers will learn how the amplification of disinformation can be linked to social media s business model Examples include how social media algorithms promote addictive content how fake news sites use ad fraud to lure in advertising revenue and how some content creators rely on clickbait ragebait bots and conspiracy theories to boost their engagement metrics The book is a must read for scholars in journalism media studies and political communication as well as policymakers interested in the democratic governance of social media platforms In addition it calls for digital marketing advertising and brand management professionals to take responsibility for their ad spending by advocating for greater oversight over AdTech intermediaries to prevent unethical actors from monetizing the harmful content that polarizes society and undermines democratic institutions

**Defending Assessment Security in a Digital World** Phillip Dawson,2020-10-26 Defending Assessment Security in a Digital World explores the phenomenon of e cheating and identifies ways to bolster assessment to ensure that it is secured against threats posed by technology Taking a multi disciplinary approach the book develops the concept of assessment security through research from cybersecurity game studies artificial intelligence and surveillance studies Throughout there is a rigorous examination of the ways people cheat in different contexts and the effectiveness of different approaches at stopping cheating This evidence informs the development of standards and metrics for assessment security and ways that assessment design can help address e cheating Its new concept of assessment security both complements and challenges traditional notions of academic integrity By focusing on proactive principles based approaches the book equips educators technologists and policymakers to address both current e cheating as well as future threats
