The vehicles listed above have a crankshaft tone ring built into the flywheel. The dual mass flywheel is not indexed on the crankshaft and can be installed different ways.

When installed incorrectly, the vehicle may not start, have a check engine light, and the engine will not rev past 2,000 RPM.

When removing a dual mass flywheel from the vehicles listed to the left, it is recommended to make your own indexing marks on the flywheel and crankshaft. When installing the new flywheel, transfer your marks from the old flywheel to the new flywheel to ease installation and assure proper indexing.

If you have already removed the flywheel and did not make any indexing marks, follow this procedure for proper installation:
