This document is intended for use by authorized Nokia service centers only.

"Service Schematics" was created with focus on customer care.

It contains additional information such as e.g. "Component Finder".

The "Signal Overview" page gives a good and fast overview about the most important signals and voltages on board.

Saving process time and improving the repair quality is the aim of this document. It is to be used additionally to the service manual and other training or service information such as Service Bulletin.

### All measurements were made using the following equipment:

As example clicking on the measurement point  guides you to the matching oscillogram on the signal overview page. The next click sets the row down signal guides you to the related measurement point on the module. Finally, a third click, now onto the measurement point  on the module takes you back to the starting point inside the schematics.
