Nonionic Surfactants Dieter Balzer, Harald Luders, 2000-07-12 This volume provides a comprehensive overview for recognizing and producing the characteristics of successful special surfactant agents. It highlights one of the most versatile and effective surface active surfactant agents detailing the synthesis and production chemical properties and behaviours and application for alkyl polyglucosides    Handbook of Detergents, Part E Uri Zoller, 2008-10-29 An Examination of Detergent Applications The fifth volume in a six volume project penned by detergent industry experts this segment deals with the various applications of detergent formulations surfactants builders sequestering chelating agents as well as other components. These applications are discussed with respect to the scope of their domestic institutional or industrial usages. Special focus is given to technological advancement health and environmental concerns and the rapid changes occurring in the field within the past several years. With each chapter providing the special access of a pioneering researcher this text offers an insider's look at the most current advances    Handbook of Detergents, Part F Uri Zoller, Paul Sosis, 2008-11-20

This sixth part of the multi volume Handbook of Detergents focuses on the production of surfactants builders and other key components of detergent formulations including the various multi dimensional aspects and implications on detergent formulations and applications domestically institutionally in industry and agriculture with all the environmental consequences involved. Thus Part F constitutes a comprehensive treatise of the multi dimensional issues relating to this industry production technology emphasizing the alignment of scientific knowledge and up to date technological and technical know how with the relevant contemporary applied practice. An international effort and industry academia collaboration this volume features expert contributions focusing on the contemporary state of the art concerning the many facets of the production of detergents and surfactants. Thus the Handbook of Detergents Part F Production deals with the production of anionic cationic nonionic and amphoteric surfactants key builders bleaching and whitening agents enzymes and other components of detergent formulations in different contexts gauges and related concerns and discusses various technological procedures of production processes involving the components of surfactants and detergents    **Handbook of Detergents -**

**Oilfield Chemistry and its Environmental Impact** Henry A. Craddock, 2018-08-06 Consolidates the many different chemistries being employed to provide environmentally acceptable products through the upstream oil and gas industry. This book discusses the development and application of green chemistry in the oil and gas exploration and production industry over the last 25 years bringing together the various chemistries that are utilised for creating suitable environmental products. Written by a highly respected consultant to the oil and gas industry it introduces readers to the

principles and development of green chemistry in general and the regulatory framework specific to the oil and gas sector in the North Sea area and elsewhere in the world. It also explores economic drivers pertaining to the application of green chemistry in the sector. Topics covered in Oilfield Chemistry and its Environmental Impact include polymer chemistry, surfactants and amphiphiles, phosphorus chemistry, inorganic salts, low molecular weight organics, silicon chemistry and green solvents. It also looks at sustainability in an extractive industry examining the approaches used and the other methodologies that could be applied in the development of better chemistries along with discussions about where the application of green chemistry is leading in this industry sector. Provides the reader with a ready source of reference when considering what chemistries are appropriate for application to oilfield problems and looking for green chemistry solutions. Brings together the pertinent regulations which workers in the field will find useful alongside the chemistries which meet the regulatory requirements. Written by a well known specialist with a combined knowledge of chemistry, manufacturing procedures and environmental issues.
