**Handbook of Detergents, Part F** Uri Zoller, Paul Sosis, 2008-11-20 This sixth part of the multi-volume Handbook of Detergents focuses on the production of surfactants, builders, and other key components of detergent formulations, including the various multi-dimensional aspects and implications on detergent formulations and applications domestically, institutionally, in industry, and agriculture, with all the environmental consequences involved. Thus, Part F constitutes a comprehensive treatise of the multi-dimensional issues relating to this industry. Production technology emphasizes the alignment of scientific knowledge and up-to-date technological and technical know-how with the relevant contemporary applied practice. An international effort and industry-academia collaboration, this volume features expert contributions focusing on the contemporary state of the art concerning the many facets of the production of detergents and surfactants. Thus, the Handbook of Detergents, Part F, Production deals with the production of anionic, cationic, nonionic, and amphoteric surfactants, key builders, bleaching and whitening agents, enzymes, and other components of detergent formulations in different contexts, gauges, and related concerns, and discusses various technological procedures of production processes involving the components of surfactants and detergents.

**Handbook of Lubrication and Tribology** George E. Totten, 2006-04-06 When it was first published some two decades ago, the original Handbook of Lubrication and Tribology stood on technology's cutting edge as the first comprehensive reference to assist the emerging science of tribology and lubrication. Later followed by Volume II, Theory and Design, and Volume III, Monitoring Materials, Synthetic Lubricants, and Applications, it has continued to serve as the cornerstone of every tribology and lubrication science library, providing engineers, researchers, and technicians with the information they need to do their work and pioneer the advancements that have dramatically reshaped this field. Now, due to those advances, the time has come to retool tribology's master text. In addition to offering tribologists the facts, figures, and equations they need everyday, Volume I, Application and Maintenance, Second Edition, positions itself at the forefront of the field to address the latest technology related to application and maintenance procedures, as well as changes in our understanding of how lubrication principles

impact implementation Completely reorganized to aid the reader in identifying chapters and topics of interest every one of the chapters retained from the first edition has either been fully updated and revised or completely rewritten by a peer recognized team of experts who are currently active in a wide variety of industry segments With the addition of several new subject areas it now boasts a total of 37 chapters

**Fluorescence Studies of Polymer Containing Systems** Karel Procházka,2016-02-03 This volume describes the application of fluorescence spectroscopy in polymer research The first chapters outline the basic principles of the conformational and dynamic behavior of polymers and review the problems of polymer self assembly Subsequent chapters introduce the theoretical principles of advanced fluorescence methods and typical examples of their application in polymer science The book closes with several reviews of various fluorescence applications for studying specific aspects of polymer solution behavior It is a useful resource for polymer scientists and experts in fluorescence spectroscopy alike facilitating their communication and cooperation
