## **Nonmammalian Animal Models For Biomedical Research Vol 1:**

Nonmammalian Animal Models for Biomedical Research Avril D. Woodhead, 1989-11-30 This book provides essential knowledge and information required to adequately assess useful alternatives from among the lower vertebrates and the invertebrates. This volume highlights unfamiliar and underdeveloped organisms that have the potential to become very satisfactory surrogates for biomedical research. A practical guide aimed at disseminating information to researchers about new models this work provides comparative biomedical studies at many levels of the phylogenetic ladder.

Epigenetics in Aquaculture Francesc Piferrer, Hanping Wang, 2023-07-03 EPIGENETICS IN AQUACULTURE This essential guide will allow you to understand how new developments in our knowledge of epigenetic mechanisms and epigenetic inheritance can be applied to improve aquaculture production and aquatic resource management and conservation. Epigenetics is the study of heritable changes in gene expression that are independent of alterations in the nucleotide sequence. It integrates genomic and environmental influences to shape the phenotype. Epigenetics is a field with particular relevance to aquaculture and aquatic organisms since it underpins acclimatory responses to diverse and changing environments and inheritance of desired phenotypes. Epigenetics in Aquaculture provides a comprehensive introduction to epigenetics epigenetic mechanisms epigenetic inheritance and research methods. It also provides the current state of the art on research and development on epigenetics in the major functions of aquatic organisms in the framework of aquaculture production. The fact that aquaculture is the fastest growing sector of food production makes the book especially timely. Readers will also find detailed treatment of subjects including aquatic faunal reproduction sex determination growth regulation nutritional programming disease resistance stress response and much more. Survey of current research lacunae and the projected future of the discipline. An authorial team of internationally renowned experts. Epigenetics in Aquaculture is a valuable reference for researchers biologists and advanced students in any area of marine science oceanography aquaculture environmental science and food production.

Education and Training in the Care and Use of Laboratory Animals National Research Council, Division on Earth and Life Studies, Institute for Laboratory Animal Research, Commission on Life Sciences, Committee on Educational Programs in Laboratory Animal Science, 1991-02-01 Federal law now requires that institutions provide training for anyone caring for or using laboratory animals. This volume provides the guidelines and resources needed to coordinate a quality training program as well as to meet all legal requirements. A core module for all personnel takes no more than four hours to present. Most staff then proceed to one or more additional skills development modules including the species specific module that can be customized to any species in use at the institution the pain management module and the surgery module. The volume provides content information for required topics from ethics to record keeping and lists sources of additional publications audiovisual programs and computerized teaching aids. Included are Ready to use teaching outlines with detailed instructions for presenting material. Practical guidelines on logistics covering scheduling budgeting and more.

Guidelines on how to design training for adults and how to work with investigators who may resist taking training courses This practical guidebook will be necessary for research institutions particularly for staff members responsible for training coordination
