**Nonparametric Functional Data Analysis** Frédéric Ferraty,Philippe Vieu,2006-11-22 Modern apparatuses allow us to collect samples of functional data mainly curves but also images On the other hand nonparametric statistics produces useful tools for standard data exploration This book links these two fields of modern statistics by explaining how functional data can be studied through parameter free statistical ideas At the same time it shows how functional data can be studied through parameter free statistical ideas and offers an original presentation of new nonparametric statistical methods for functional data analysis

*Geostatistical Functional Data Analysis* Jorge Mateu,Ramon Giraldo,2021-12-13 Geostatistical Functional Data Analysis Explore the intersection between geostatistics and functional data analysis with this insightful new reference Geostatistical Functional Data Analysis presents a unified approach to modelling functional data when spatial and spatio temporal correlations are present The Editors link together the wide research areas of geostatistics and functional data analysis to provide the reader with a new area called geostatistical functional data analysis that will bring new insights and new open questions to researchers coming from both scientific fields This book provides a complete and up to date account to deal with functional data that is spatially correlated but also includes the most innovative developments in different open avenues in this field Containing contributions from leading experts in the field this practical guide provides readers with the necessary tools to employ and adapt classic statistical techniques to handle spatial regression The book also includes A thorough introduction to the spatial kriging methodology when working with functions A detailed exposition of more classical statistical techniques adapted to the functional case and extended to handle spatial correlations Practical discussions of ANOVA regression and clustering methods to explore spatial correlation in a collection of curves sampled in a region In depth explorations of the similarities and differences between spatio temporal data analysis and functional data analysis Aimed at mathematicians statisticians postgraduate students and researchers involved in the analysis of functional and spatial data Geostatistical Functional Data Analysis will also prove to be a powerful addition to the libraries of geoscientists environmental scientists and economists seeking insightful new knowledge and questions at the interface of geostatistics and functional data analysis
