A complete glossary, useful appendices, and a thorough list of references round out the presentation. The text also includes a 16 page insert containing 28 full color illustrations. Environment Canada, Canada. National Office of Pollution Prevention, Nortel Networks, 2000. The study first introduces the concepts of LCA and DfE and reviews the project organization, scope, and methodology. It then presents the results of the project and the associated peer review process. The final section discusses the implications of the LCA and the potential for improving the environmental performance. The product studied was the Nortel M7310 business telephone, and the LCA study examined the material, energy flows, and the environmental releases associated with its manufacture, distribution, use, and disposal, recycling. The examination of potential improvement compared the baseline impact results with those of a telephone using new keypad technology, a thin-walled housing, and different end-of-life options: shredding versus smelting. *Mergent Bank & Finance Manual*, 2003. *Moody's International Manual*, 1994. *TENCON 2004*, 2004. **UNIX Review's Performance Computing**, 1998-04.
