## **Not In The Heavens The Tradition Of Jewish Secular Thought:**

**Not in the Heavens** David Biale, 2015-10-27 The story of the origins and development of a Jewish form of secularism *Not in the Heavens* traces the rise of Jewish secularism through the visionary writers and thinkers who led its development. Spanning the rich history of Judaism from the Bible to today David Biale shows how the secular tradition these visionaries created is a uniquely Jewish one and how the emergence of Jewish secularism was not merely a response to modernity but arose from forces long at play within Judaism itself. Biale explores how ancient Hebrew books like Job Song of Songs and Esther downplay or even exclude God altogether and how Spinoza inspired by medieval Jewish philosophy recast the biblical God in the role of nature and stripped the Torah of its revelatory status to instead read scripture as a historical and cultural text. Biale examines the influential Jewish thinkers who followed in Spinoza's secularizing footsteps such as Salomon Maimon Heinrich Heine Sigmund Freud and Albert Einstein. He tells the stories of those who also took their cues from medieval Jewish mysticism in their revolts against tradition including Hayim Nahman Bialik Gershom Scholem and Franz Kafka. And he looks at Zionists like David Ben Gurion and other secular political thinkers who recast Israel and the Bible in modern terms of race nationalism and the state. *Not in the Heavens* demonstrates how these many Jewish paths to secularism were dependent in complex and paradoxical ways on the very religious traditions they were rejecting and examines the legacy and meaning of Jewish secularism today. [Mapping the Academic Debate](#) Johannes Duschka, Christoph Kleine, Monika

Wohlrab-Sahr, Florian Zemmin, 2024-12-16 This volume maps the international academic debate on secularity. It places seminal contributions from within Western academia alongside less well known texts from various parts of the world. In several cases this is the first time that they have been translated into English. The volume demonstrates that the academic debate on secularity was and is a global debate with contributions from many regions. The collected texts relate to each other either directly or indirectly by referring to similar arguments whether reinforcing or criticising them and thus create a discourse. When speaking of global secularity we therefore do not insinuate a uniform world secularity resulting from the alleged global diffusion of Western norms ideas and concepts. It is rather a web of relations that is constituted via various different references. These references are not evenly distributed the development in the West is often the point of reference to which positions from other regions relate to which they connect or from which they distance themselves. But the references are not completely unidirectional. We also present texts from Europe that underline the multidirectionality of the process even early on. Thereby the volume offers the reader the material with which to trace these global exchanges and references. **The Routledge Handbook of Contemporary Jewish Cultures** Nadia Valman, Laurence Roth, 2017-07-14

The Routledge Handbook to Contemporary Jewish Cultures explores the diversity of Jewish cultures and ways of investigating them presenting the different methodologies arguments and challenges within the discipline. Divided into themed sections this book considers in turn How the individual terms Jewish and culture are defined looking at perspectives from

Anthropology Music Literary Studies Sociology Religious Studies History Art History and Film Television and New Media Studies How Jewish cultures are theorized looking at key themes regarding power textuality religion secularity memory bodies space and place and networks Case studies in contemporary Jewish cultures With essays by leading scholars in Jewish culture this book offers a clear overview of the field and offers exciting new directions for the future Jewish Mad Men Kerri P. Steinberg, 2015-02-16 It is easy to dismiss advertising as simply the background chatter of modern life often annoying sometimes hilarious and ultimately meaningless But Kerri P Steinberg argues that a careful study of the history of advertising can reveal a wealth of insight into a culture In Jewish Mad Men Steinberg looks specifically at how advertising helped shape the evolution of American Jewish life and culture over the past one hundred years Drawing on case studies of famous advertising campaigns from Levy's Rye Bread You don't have to be Jewish to love Levy's to Hebrew National hot dogs We answer to a higher authority Steinberg examines advertisements from the late nineteenth century in New York the center of advertising in the United States to trace changes in Jewish life there and across the entire country She looks at ads aimed at the immigrant population at suburbanites in midcentury and at hipster and post denominational Jews today In addition to discussing campaigns for everything from Manischewitz wine to matzoh Jewish Mad Men also portrays the legendary Jewish figures in advertising like Albert Lasker and Bill Bernbach and lesser known Mad Men like Joseph Jacobs whose pioneering agency created the brilliantly successful Maxwell House Coffee Haggadah Throughout Steinberg uses the lens of advertising to illuminate the Jewish trajectory from outsider to insider and the related arc of immigration acculturation upward mobility and suburbanization Anchored in the illustrations photographs jingles and taglines of advertising Jewish Mad Men features a dozen color advertisements and many black and white images Lively and insightful this book offers a unique look at both advertising and Jewish life in the United States *Diaspora and Law* Liliana Ruth Feierstein, Daniel Weidner, 2023-09-18 Today law is no longer homogenous or unquestioned Different overlapping legal systems constantly interfere with one another both on an international level in complex transnational contexts such as the European Union or human rights law but also in the context of cultural diversity or conflicts between religious norms and civil institutions between minorities and the power of the state On the other hand the neutrality of law is also under growing pressure be it from different global transnational players or from within nation states where calls are made to adapt law to the will of the people The heated European debate on the refugee crisis has made it manifest that law is more necessary than ever and yet fundamentally contested perhaps even caught in contradictions and self limitations At the same time the current perspective on legal problems allows us to address issues of diversity and the role of Europe in the globalized world more clearly The articles of this book take these recent developments and debates as a starting point to discuss from the perspective of different disciplines the pressing question of how to live together in the new millennium and how to figure the long history of law before besides and after the dominant paradigm of state law Learning from Other Religious Traditions Hans

Gustafson,2018-05-16 This book brings together academic scholars from across various religious traditions to reflect on the beauty they find in traditions other than their own They examine these aspects and reflect on how they inform and constructively assist with rethinking their own religious worldviews and practices Each scholar investigates the various implications questions insights and challenges that are generated in the process of doing so Traditions discussed include satr Heathenism Buddhism Catholicism Evangelical Christianity Hinduism Islam Judaism LDS Mormon Christianity Lutheranism Presbyterianism Sikhism Sufism Western Buddhism and Zen Mah y na Buddhism Instead of focusing only or primarily on the theory and practice of interreligious dialogue this book presents living examples of learning from other religious traditions identities and persons
