Twenty six hundred years ago among the Ionian Greeks there arose the kind of reasoned inquiry after truth that characterizes philosophy in Western civilization A path with many twists and turns and desolate stretches as well is traceable from this ancient beginning to the types of philosophy pursued in the West today The aim of the present volume is to acquaint the reader with landmarks along this path as far as the end of the Middle Ages until about 1350 when the Renaissance began its work of shaping the modern era Western philosophers of the Ancient and Medieval periods have had great influence not only upon later philosophers but also upon the general culture of the West Politics religion the arts the sciences the very notions that pass for common sense all have been complexly affected directly and indirectly by the philosophical methods and findings of Pythagoras Socrates Plato Aristotle Cicero Plotinus St Augustine St Thomas Aquinas Ockham and others to be examined herein Some knowledge of these thinkers is essential to any real understanding of the whys and wherefores of Western cultural history Moreover because most of the philosophical issues investigated in modern times first came up in Ancient or Medieval discussions a grasp of the latter is necessary to a just estimate of more recent discussions and to an avoidance of blind alleys and delayed insights in one's own philosophical reflections It is also true that the ideas and intellectual careers of Ancient and Medieval philosophers are matters of absorbing interest on their own account Simply as personalities these thinkers are extraordinary and their respective contributions toward overcoming the reign of chaos and old night are among the noblest of human achievements
