Pauline Novak Reich:

Mystifying Square, Divine Proportions - Nature's Black Box Pauline Novak-Reich, 2014-11-01 This volume traces W D Gann's Time Factor and Law of Vibration back to the Chaldeans of 3000 BCE Sumer whose principal aspiration was to understand the motion of time. They divided time into years months weeks days hours minutes and seconds and devised calendars which helped them predict and therefore survive their two rivers ravaging floods. Inadvertently their findings also solved the mystery behind the ups and down of money markets. From ancient Sumer to Egypt ancient China to the native peoples of Central and North America civilisations unlikely to have had contact with each other built remarkably similar monuments according to geometrical proportions designed to embody cosmic knowledge that would last for all time. Each deciphered time cycles created calendars and made long term projections of natural phenomena. The Square of 9 is a matrix embodying nature's cosmic clock. Pauline Novak Reich takes the reader through ancient math sacred geometry and lore demonstrating the extraordinary achievements of people who lived in tandem with nature. Each one of these civilisations discovered Nature's Black Box. Gann often reiterated that Everything in existence is based on exact proportion and perfect relationship. There is no chance in nature because mathematical principles of the highest order lie at the foundation of all things. Vibration is fundamental nothing is exempt from this law. It is universal therefore applicable to every class of phenomena on the globe.

The Bell Does Ring! Pauline C. Reich, Pauline Novak-Reich, 2005 One of the most common phrases expounded by so called market experts is Nobody rings a bell when the market tops or bottoms. Pauline Novak Reich disagrees. In *The Bell Does Ring* Timing the Australian Stock Market with Gann and Elliott Pauline shows how the art of timing is vital to improve the bottom line of all share traders. Using an understanding of cycles chart analysis and a number of techniques derived from the work of W D Gann and R N Elliott Pauline outlines how markets can be traded for maximum profit. The wealth of information covered in this book includes the historical cycles of boom and bust chart analysis and pattern recognition the Fibonacci sequence and its role in support and resistance levels Elliott's wave theory Gann's price and time squaring and the theories behind the square of nine. Picking market tops and bottoms is the key to maximising share trading profits. This book shows how you too can recognise the signals and hear the bells in the marketplace.
