why the baby may be admitted to the neonatal unit ?!

Babies are admitted to the neonatal unit for a number of reasons. Such as

1- **preterm birth** and **term babies** who are unwell or need medical or surgical investigations or treatments. If the baby is born before 35 weeks gestation, and/or his birth weight was 1500 gm, they will usually be admitted to the neonatal

2- **Breathing issues** Respiratory problems are common in newborns, particularly those born prematurely. Two primary breathing issues that may necessitate a NICU stay include:

- **Respiratory distress syndrome:** Often seen in premature babies, this occurs when the lungs are not fully developed and lack surfactant, which helps keep the air sacs open.
- **Transient tachypnea of the newborn** is characterized by rapid breathing and typically resolves within a few days as the baby's lungs clear excess fluid.
- 3- **Problems regulating blood sugar** **Low blood sugar, or hypoglycemia**, can be a concern for newborns, especially those who are premature or whose mothers have diabetes or gestational diabetes. Babies with hypoglycemia may need close monitoring and treatment to ensure their blood sugar levels remain stable.
