Handbook of Research on Artificial Intelligence Applications in the Aviation and Aerospace Industries

Shmelova, Tetiana, Sikirda, Yuliya, Sterenharz, Arnold, 2019-10-11 With the emergence of smart technology and automated systems in today's world artificial intelligence AI is being incorporated into an array of professions. The aviation and aerospace industry specifically is a field that has seen the successful implementation of early stages of automation in daily flight operations through flight management systems and autopilot. However, the effectiveness of aviation systems and the provision of flight safety still depend primarily upon the reliability of aviation specialists and human decision making. The Handbook of Research on Artificial Intelligence Applications in the Aviation and Aerospace Industries is a pivotal reference source that explores best practices for AI implementation in aviation to enhance security and the ability to learn, improve, and predict. While highlighting topics such as computer-aided design, automated systems, and human factors, this publication explores the enhancement of global aviation security as well as the methods of modern information systems in the aeronautics industry. This book is ideally designed for pilots, scientists, engineers, aviation operators, air crash investigators, teachers, academicians, researchers, and students seeking current research on the application of AI in the field of aviation.

International Civil Aviation Organization (ICAO) Ludwig Weber, 2023-08-20 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of the structure, competence, and management of the International Civil Aviation Organization (ICAO) provides substantial and readily accessible information for lawyers, academics, and policymakers likely to have dealings with its activities and data. No other book gives such a clear, uncomplicated description of the organization's role, its rules, and how they are applied; its place in the framework of international law; or its relations with other organizations. The monograph proceeds logically from the organization's genesis and historical development to the structure of its membership, its various organs, and their mandates; its role in intergovernmental cooperation; and its interaction with decisions taken at the national level. Its competence, its financial management, and the nature and applicability of its data and publications are fully described. Systematic in presentation, this valuable time-saving resource offers the quickest, easiest way to acquire a sound understanding of the workings of the International Civil Aviation Organization (ICAO) for all interested parties. Students and teachers of international law will find it especially valuable as an essential component of the rapidly growing and changing global legal milieu.

China Satellite Navigation Conference (CSNC) 2018 Proceedings Jiadong Sun, Changfeng Yang, Shuren Guo, 2018-05-03 These proceedings present selected research papers from CSNC 2018 held during 23rd-25th May in Harbin, China. The theme of CSNC 2018 is Location Time of Augmentation. These papers discuss the technologies and applications of the Global Navigation Satellite System (GNSS) and the latest progress made in the China BeiDou System (BDS), especially. They are divided into 12 topics to match the corresponding sessions in CSNC 2018, which broadly covered key topics in GNSS. Readers can learn about the BDS and keep abreast of the latest

advances in GNSS techniques and applications **Understanding the Airport's Role in Performance-based Navigation** Sebastian D. Timar, Robb Varani, Robert Hemm, Brian Townsend, Mark Ricketson, Wayne MacKenzie, William J. Dunlay, Grafton Technologies, Inc, 2016 TRB's Airport Cooperative Research Program ACRP Report 150 NextGen for Airports Volume I Understanding the Airport's Role in Performance Based Navigation Resource Guide the first report in this series provides comprehensive information to practitioners concerning all aspects of Performance Based Navigation PBN and how implementation affects overall airport operations This Resource Guide encompasses background information description of effects on short and long term airport development impacts on safety and performance measures and other critical factors affecting future airport operations In addition to providing guidance to users on available resources for additional assistance this volume also includes lessons learned and best practices based on findings from case studies that examined the airport operator's role in PBN implementation The Next Generation Air Transportation System NextGen refers to the federal programs predominately airspace air traffic or avionics related that are designed to modernize the National Airspace System NAS ACRP's NextGen initiative aims to inform airport operators about some of these programs and how the enabling practices data and technologies resulting from them will affect airports and change how they operate Publisher *Global Navigation Satellite System (GNSS) Manual*, 2013 Cognitive Infocommunications, Theory and Applications Ryszard Klempous, Jan Nikodem, Péter Zoltán Baranyi, 2018-08-25 The book gathers the chapters of Cognitive InfoCommunication research relevant to a variety of application areas including data visualization emotion expression brain computer interfaces or speech technologies It provides an overview of the kind of cognitive capabilities that are being analyzed and developed Based on this common ground it may become possible to see new opportunities for synergy among disciplines that were heretofore viewed as being separate Cognitive InfoCommunication begins by modeling human cognitive states and aptitudes in order to better understand what the user of a system is capable of comprehending and doing The patterns of exploration and the specific tools that are described can certainly be of interest and of great relevance for all researchers who focus on modeling human states and aptitudes This innovative research area provides answers to the latest challenges in influence of cognitive states and aptitudes in order to facilitate learning or generally improve performance in certain cognitive tasks such as decision making Some capabilities are purely human while others are purely artificial but in general this distinction is rarely clear cut Therefore when discussing new human cognitive capabilities the technological background which makes them possible cannot be neglected and indeed often plays a central role This book highlights the synergy between various fields that are perfectly fit under the umbrella of CogInfoCom and contribute to understanding and developing new human artificial intelligence hybrid capabilities These merged capabilities are currently appearing and the importance of the role they play in everyday life are unique to the cognitive entity generation that is currently growing up **Proceedings of the 2nd International Workshop on Advances in Civil Aviation Systems Development** Ivan Ostroumov, Maksym
