Understanding and improving the functional and nutritional properties of milk

Prof Thom Huppertz,Prof Todor Vasiljevic,2022-03-15 Comprehensive coverage of the latest research in isolating and analysing the diverse range of compounds in milk Reviews the genetic factors that affect milk composition as well as the ways milk chemistry can affect sensory quality Explores the importance of milk as a valuable commodity

Shifting Food Facts Alissa Overend,2020-11-15 This book offers a much needed reframing of food discourse by presenting alternative ways of thinking about the changing politics of food eating and nutrition It examines critical epistemological questions of how food knowledge comes to be shaped and why we see pendulum swings when it comes to the question of what to eat As food facts peak and peril in the face of conflicting dietary advice and nutritional evidence this book situates shifting food truths through a critical analysis of how healthy eating is framed and contested particularly amid fluctuating truth claims of a post truth culture It explores what a post truth epistemological framework can offer critical food and health studies considers the type of questions this may enable and looks at what can be gained by relinquishing rigid empirical pursuits of singular dietary truths In focusing too intently on the separation between food fact and food fiction the book argues that politically dangerous and epistemically narrow ideas of one way to eat healthy or right are perpetuated Drawing on a range of archival materials related to food and health and interviews with registered dietitians this book offers various examples of shifting food truths from macro historical genealogies to contemporary case studies of dairy wheat and meat Providing a rich and innovative analysis this book offers new ways to think about and act upon our increasingly complex food landscapes It does so by loosening our empirical Western reliance on singular food facts in favour of an articulation of contextual food truths that situate the problems of health as problems of living not as individualistic problems of eating It will be of interest to students scholars and practitioners working in food studies food politics sociology environmental geography health nutrition and cultural studies

Instant Insights: Nutritional benefits of milk Dr Jan Geurts,Shane V. Crowley,Dr James A.

O'Mahony,Patrick F. Fox,Young W. Park,Prof Michael Gänzle,2023-02-21 This collection features four peer reviewed reviews on the nutritional benefits of milk The first chapter highlights the important role of milk and dairy products in human diets due to the amount of energy calories they provide and their ability to compensate for foods in the diet with lesser nutritional

value The chapter also reviews the dairy matrix concept and how this matrix can influence human physiology The second chapter provides an overview of major and minor milk proteins including caseins whey proteins and indigenous milk enzymes The chapter discusses a selection of milk protein products which are produced on an industrial scale to support human health and growth such as the use of whey protein in infant formula and dietary supplements The third chapter reviews current knowledge on bioactive components existing in cow s milk and colostrum their biological and nutritional functionalities as well as how these components can be exploited for the benefit of human health and physiological metabolism function The final chapter provides an overview of the nutritional properties of dairy carbohydrates and major glycoproteins in cow s milk The chapter considers the contribution of lactose as a substrate for beneficial colonic fermentation to short chain fatty acids as well as the importance of glycoproteins in infant diets
