

## My Autobiography

I am Adrian Carl V. Dumat-ol. I am currently studying at Lanao del Norte Comprehensive High School. I'm working on an autobiographical essay about a life event that motivates me to study harder. I am writing about my experience when I found out that I have half siblings. That incident had a huge impact on me.

It all happened one summer day in 2011 when I was still 6 years old. At that time, I had no idea that I had a half sibling. One day, my father told me to go with him because we were going to visit my aunt. While we were traveling, my father told me that there was something that I needed to know, and he never told me that it was all about my half-siblings. When we arrived at my aunt's house, I noticed my big sister, and at that time, I didn't know she was my half sibling. All I knew is that we have the same mother, which is not.

While we were talking, father revealed a family secret to me that I had not known since I was born. That is, my older sister and I are not purely siblings because we had different mothers. I didn't believe them at first, but as I looked into their eyes, they seemed very serious. My half-sister spoke to me, and she confirmed everything our father had said, and she reassured me that even though we have different mothers, we are still siblings. I feel better and relieved after we talk.

Several years have passed, and my half siblings are changing the way they treat us. So I keep my distance and stop contacting them. They asked our father why I was not contacting them. Back then, I was the one who was going to chat with them first or contact them. They confronted me about why I was avoiding them, and I told them that they were the first ones who changed the way they treated us.

One day, my half siblings start making rumors that because of my mother, our father is starting to lose money, which is not true. So I was stunned by what they said. I asked them why they started to spread rumors about my mother. They made a lot of excuses and now we are still on bad terms.

Even though many problems happen, I need to stay strong and not be affected by what happened. I need to respect my elders, even if they have done bad things to me. Do not put your faith in all of their promises because there is a chance they will break them. Always choose good deeds because of all of the things you have done, God will always watch you.

*Mediaeval and Renaissance Logic* Dov M. Gabbay, John Woods, 2008-03-14 Starting at the very beginning with Aristotle's founding contributions logic has been graced by several periods in which the subject has flourished attaining standards of rigour and conceptual sophistication underpinning a large and deserved reputation as a leading expression of human intellectual effort It is widely recognized that the period from the mid 19th century until the three quarter mark of the century just past marked one of these golden ages a period of explosive creativity and transforming insights It has been said that ignorance of our history is a kind of amnesia concerning which it is wise to note that amnesia is an illness It would be a matter for regret if we lost contact with another of logic's golden ages one that greatly exceeds in reach that enjoyed by mathematical symbolic logic This is the period between the 11th and 16th centuries loosely conceived of as the Middle Ages The logic of this period does not have the expressive virtues afforded by the symbolic resources of uninterpreted calculi but mediaeval logic rivals in range originality and intellectual robustness a good deal of the modern record The range of logic in this period is striking extending from investigation of quantifiers and logic consequence to inquiries into logical truth from theories of reference to accounts of identity from work on the modalities to the stirrings of the logic of relations from theories of meaning to analyses of the paradoxes and more While the scope of mediaeval logic is impressive of greater importance is that nearly all of it can be read by the modern logician with at least some prospect of profit The last thing that mediaeval logic is is a museum piece Mediaeval and Renaissance Logic is an indispensable research tool for anyone interested in the development of logic including researchers graduate and senior undergraduate students in logic history of logic mathematics history of mathematics computer science and AI linguistics cognitive science

argumentation theory philosophy and the history of ideas Provides detailed and comprehensive chapters covering the entire range of modal logic Contains the latest scholarly discoveries and interpretative insights that answer many questions in the field of logic
