Discourse, Dialogue and Technology Enhanced Learning Rachel Pilkington,2015-11-19 Discourse Dialogue and Technology Enhanced Learning is invaluable to all those wanting to explore how dialogic processes work and how we facilitate them Dialogue is an important learning tool and it is by understanding how language affects us and how we use language to encourage empathise inquire argue and persuade that we come closer to understanding processes of change in ourselves and our society Most researchers in Education will find themselves interpreting some form of data in the form of words whether these words be explanations conversations narrations reflections debates or interviews and whether they are conducted through digital media or face to face Discourse textual or spoken is therefore central to researching education Each chapter focuses on the ways in which alternative levels of discourse analysis provide tools for the researcher enabling insights into the way language works in learning teaching practice and wider society Drawing on the author s own DISCOUNT discourse analysis coding scheme and including a wide range of dialogue examples this book covers Why Dialogue The Role of Dialogue in Education Debate Learning to Argue and Arguing to Learn Towards Meaning Making Inquiry Narrative and Experience The Role of the Significant Other Facilitation Scaffolding and Mediation Inclusion Collaboration and Community Media Mode and Digital Literacy Researching Voices and Texts Discourse Dialogue and Technology Enhanced Learning will be an essential resource for all students educators and educational researchers who have an interest in the role of discourse in educational contexts

Studying Virtual Math Teams

Gerry Stahl,2010-05-03 Studying Virtual Math Teams centers on detailed empirical studies of how students in small online groups make sense of math issues and how they solve problems by making meaning together These studies are woven together with materials that describe the online environment and pedagogical orientation as well as reflections on the theoretical implications of the findings in the studies The nature of group cognition and shared meaning making in collaborative learning is a foundational research issue in CSCL More generally the theme of sense making is a central topic in information science While many authors allude to these topics few have provided this kind of detailed analysis of the mechanisms of intersubjective meaning making This book presents a coherent research agenda that has been pursued by the author and his research group The book opens with descriptions of the project and its methodology as well as situating this research in the past and present context of the CSCL research field The core research team then presents five concrete analyses of group interactions in different phases of the Virtual Math Teams research project These chapters are followed by several studies by international collaborators discussing the group discourse the software affordances and alternative representations of the interaction all using data from the VMT project The concluding chapters address implications for the theory of group cognition and for the methodology of the learning sciences In addition to substantial introductory and concluding chapters this important new book includes analyses based upon the author s previous research thereby providing smooth continuity and an engaging flow

that follows the progression of the research The VMT project has dual goals a to provide a source of experience and data for practical and theoretical explorations of group knowledge building and b to develop an effective online environment and educational service for collaborative learning of mathematics Studying Virtual Math Teams reflects these twin orientations reviewing the intertwined aims and development of a rigorous science of small group cognition and a Web 2.0 educational math service It documents the kinds of interactional methods that small groups use to explore math issues and provides a glimpse into the potential of online interaction to promote productive math discourse [Overview and Autobiographical Essays](#) Gerry Stahl,2016-01-27 The current volume is intended to provide an overview of the eLibrary and some documentation of my life as the author of these texts

E-learning Archaeology H. van Londen,Marjolijn S. M. Kok,Arkadiusz Marciniak,2009 This book is a contribution to a growing body of e learning applications in archaeology and archaeological heritage Its main aim is to discuss various facets of the Leonardo da Vinci project E learning as a tool of knowledge transfer in the field of protection and management of archaeological heritage completed in the years 2007 2009 by six European partners in the context of other undertakings in distance learning solutions in archaeology over the last few years The project s explicit objective was to exchange the best practices and innovative solutions in the field of the archaeological heritage of northern Europe In particular its major purpose was to design develop test assess and implement web based training solutions in developing and upgrading vocational skills in this sector by preparing and conducting a multimedia e learning course composed of fifteen interrelated modules Furthermore the project developed and implemented new methodology including the transfer of knowledge from the conventional to the e learning format and the elaborated training methodology The book is composed of an introduction and eleven chapters Seven of them refer directly to various facets of the project such as its design methodology implementation and evaluation The remaining four contributions discuss current initiatives in implementing different distance and e learning solutions in archaeology The introductory chapter written by Mark Pluciennik debates extensively the benefits and failures of distance learning and e learning as well as pressures for convergence between them as well as between e learning and traditional learning For the author e learning is a complement mode of content delivery which in places proves to be the most efficient one However it is clear that not all learning can be done through digital presentation video or the manipulation of processed data This is especially so in the discipline such as archaeology where one has to learn a range of practical and embodied skills If we choose to implement e learning solutions however it is necessary to provide a serious structural

resource and staff support being a prerequisite for supplying and maintaining high quality and up to date education. The following seven papers cover various aspects of the project itself. They discuss the training content as well as methodology of the course production and training. In particular they refer to the models and methods of distance training and their applicability for the sector of archaeological heritage and tools used in the distance learning process. Use of multimedia learning management systems supporting conducting distance learning in particular the LMS LCMS system's functionality as well as details of the course's preparation and implementation and the training process. An important part of the book is aimed at evaluating the course content and training process. It is based upon careful and systematic questionnaires that were collected among trainees in all participating countries after the completion of the course. This section contains also personal accounts of both trainers and trainees. The last two papers present two ongoing e learning programme in archaeology implemented. These comprise project Arkeonet conducted by the Aranzadi Science Society Spain and a Leonardo da Vinci project Archaeology and Construction Engineering Skills ACES.
