What's Killing America Jason Rantz, 2023-09-26 A stunning book about how America's biggest cities are being destroyed by progressive policies and woke Democrats Many Americans have no idea how badly our largest Democrat-run cities have deteriorated We've been complacent for far too long assuming that the craziest elements of the radical Left would stay confined to the East and West coasts But crime drug addiction homelessness left-wing school indoctrination so-called inclusive housing policies and outrageous taxes don't stay within the big city limits of places like Los Angeles Chicago Portland New York Seattle and San Francisco The effects of ideologically driven left-wing policies always spread which should alarm Americans regardless of their political leanings Jason Rantz is a prominent radio host a trusted journalist and a frequent Fox News guest unafraid to go directly into the action He's grown a national following by breaking news the mainstream media won't cover the consequences of destructive leftist policies wherever they occur He was right there for the chaos in his hometown of Seattle when liberal anarchists declared an autonomous police-free CHOP Zone He infiltrates the Antifa marches and knows firsthand how those radicals operate This is the shocking story of what he's learned Employing on-the-ground reporting and fact-based analysis Rantz zooms out to conduct a fascinating detailed data-driven study of how these liberal policies result in chaos misery and too often bloodshed He skillfully recounts the tragic events with a narrative reporter's eye for detail to tell the true story of what's happening in America's cities

SU+RE, 2018-02-14 In the 21st century architects and engineers are being challenged to produce work that is concurrently sustainable and resilient Buildings need to mitigate their impact on climate change by minimising their carbon footprint while also countering the challenging new weather conditions Globally severe storms extreme droughts and rising sea levels are becoming an increasingly reoccurring feature To respond a design process is required that seeks to integrate resiliency by building in the capacity to absorb the impacts of these disruptive events and adapt over time to further changes while simultaneously being part of the solution to the problem itself This issue of AD is guest edited by the interdisciplinary team at Stevens Institute of Technology who developed the winning entry for the 2015 US Department of Energy Solar Decathlon competition the SU+RE House While particular focus is paid to this student designed and built prototype home the publication also provides a broader discussion of the value of design-build as a model for tackling the issue of integrating sustainability and resilience and what changes are required across education policy practice and industry for widespread implementation Contributors include Bronwyn Barry Michael Bruno Alex Carpenter Adam Cohen Ann Holtzman Ken Levenson Brady Peters Terri Peters Karin Stieldorf Alex Washburn Claire Weisz and Graham
