Non-Invasive Data Governance Italian Version: Il Percorso di Minor Resistenza e Maggior Successo Robert Seiner, I programmi di Data Governance si concentrano sull'autorità e la responsabilità per la gestione dei dati come asset di valore per l'organizzazione. La Data Governance non dovrebbe riguardare comando e controllo ma a volte potrebbe diventare invasiva o minacciosa per il lavoro, le persone e la cultura di un'organizzazione. Non-Invasive Data Governance si concentra sul formalizzare la responsabilità esistente per la gestione dei dati e migliorare le comunicazioni formali, la protezione e gli impegni per la qualità attraverso un'efficace cura delle sorgenti di dati. Non-Invasive Data Governance offre un set completo di tool per supportare l'esecuzione di un programma di data governance di successo. Imparerai come i compiti degli Steward possono essere identificati e riconosciuti, formalizzati e accolti in accordo con le loro responsabilità esistenti piuttosto che essere assegnati o affidati a persone come lavoro aggiuntivo. La Governance dell'informazione può essere applicata a policy esistenti, procedure operative, standard, pratiche e metodologie piuttosto che essere introdotta o promossa come processo o metodologia nuova. La Governance dell'informazione può supportare tutta la data integration, il risk management, la business intelligence e le attività di master data management piuttosto che imporre un rigore incoerente a queste iniziative. Un approccio pratico e non minaccioso può essere applicato per governare le informazioni e promuovere la stewardship dei dati come un asset cross-organizzazione. Le Best Practices e i concetti chiave di questo approccio non minaccioso possono essere comunicati efficacemente per sfruttare i punti di forza e indirizzare le opportunità per il miglioramento.

Non-Invasive Data Governance Bob Seiner, 2019. Data governance programma's richten zich op het uitoefenen van gezag en op verantwoordelijkheid voor het managen van data als waardevol bedrijfsmiddel. Data governance hoeft niet om controle en beheersing te draaien maar kan soms invasief of bedreigend zijn voor het werk de medewerkers en de cultuur van een organisatie. Non-Invasive Data Governance™ richt zich op formalisering van bestaande verantwoordelijkheden voor het managen van data en verbetering van de formele communicatie, beveiliging en kwaliteitsinspanningen via effectief stewardship van databronnen. Scamander The Data Liberation Company heeft dit boek in het Nederlands vertaald omdat wij geloven dat de enige succesvolle benadering een non-invasive benadering is. Non-Invasive Data Governance biedt u een complete set tools om een succesvol data governance programma op te zetten. Ontdek hoe Verantwoordelijkheden en taken als steward niet als extra werk aan medewerkers hoeven te worden opgedragen of aangereikt maar kunnen worden benoemd, herkend en ingezet in overeenstemming met hun bestaande verantwoordelijkheid.

Governance van informatie niet als een nieuw proces of nieuwe methode hoeft te worden geïntroduceerd of benadrukt maar kan worden geïntegreerd in bestaand beleid reguliere werkprocedures werkwijzen en methodieken Governance van informatie geen kwestie hoeft te zijn van inconsequente discipline opgelegd aan activiteiten als data integratie risicomanagement business intelligence en master data management maar deze juist kan ondersteunen Een praktische en niet bedreigende benadering kan worden toegepast op de governance van informatie en het stimuleren van datastewardschap als een organisatiebreed asset Best practices en kernconcepten van deze niet bedreigende benadering effectief kunnen worden gecommuniceerd zodat van sterke punten kan worden geprofiteerd en verbeterpunten worden aangepakt
