**Dropshipping Made Simple** Adidas Wilson, Dropshipping is a method of retail fulfillment where stores do not actually stock their products When someone buys a product the store buys it from another party and then ships it to the customer directly The merchant neither handles nor sees the product Dropshipping is different from the conventional retail model in that in dropshipping the seller does not own an inventory He or she purchases an order from a third party The dropshipping model like everything else has drawbacks and benefits You need less capital this is arguably the biggest advantage You do not need thousands of dollars to start an ecommerce store Conventional retailers need to have a huge amount of capital to build their inventory In dropshipping you only purchase a product once a customer has placed an order and made the payment An initial inventory investment is not needed Easy to start an ecommerce business becomes much easier to run when you do not handle physical products You will not worry about a warehouse packing and shipping tracking inventory handling returns and much more Low overhead since you will not be dealing with a warehouse or

purchasing inventory expect low overhead expenses A lot of people run a dropshipping businesses from their home office with their laptop and only use about 100 per month The expenses may increase as your business grows but they will still be low Flexible location if you have an internet connection you can manage your dropshipping business from anywhere

people when they live outside of their home country too. Because there is no need to pre purchase any items you sell you can offer a broader array of products to potential customers. So if your supplier stocks a certain product you can list it for sale in your online store or on the platform you use at no additional cost. With conventional business types if you have orders for three times as much business it is likely you'll need to perform three times as much work. With the leveraging of dropshipping suppliers the majority of the work in processing additional orders is borne by your suppliers. This allows you to expand your business with fewer growing pains. Sales growth always brings some extra work. In most cases this is primarily related to customer service. Companies that exploit dropshipping as a necessity scale exceptionally well especially when compared to conventional e-commerce businesses. All of these benefits make dropshipping an advantageous and efficient model to both new and established merchants alike. Regrettably dropshipping isn't always a bed of roses though. All this convenience and flexibility comes with a few disadvantages. Let's shed some light on these.
