## **Nordic Lessons Nordic Lights:**

**Nordic Lights** Sirkka Ahonen, Jukka Rantala, 2001 The democratic model of education is often hailed as Norden's present to the world. However, when faced with the rules of market economy and the aspirations of the new middle classes, popular education came into crisis. In this book, the past and the present of the Nordic model is studied by nine scholars from Estonia, Finland, Sweden, and Norway. They question its viability as well as the credibility of its official history. **What Works in**

**Nordic School Policies?** John Benedicto Krejsler, Leif Moos, 2021-03-23 This book offers an original contribution to the area of international research on comparative education policies and the influence of transnational agencies on national school policy and reform. With a focus on grasping what the Nordic model or the Nordic dimension means in school and educational policy, the book explores in depth the school policy contexts of the five Nordic countries: Denmark, Finland, Iceland, Norway, and Sweden. It demonstrates how these particular national contexts engage with and contextualize transnational collaboration on issues like school reform, accountability, evidence, and what works, and digitalization. The book situates these policy issues over a long period of time while integrating the latest developments and reforms. It demonstrates how context matters. It shows how the often elusive but pervasive Nordic dimension can only be fully understood by painstaking scrutiny of the five national contexts, their particular trajectories, and mutual interactions in formal and informal education. Class

and Stratification Analysis Gunn Elisabeth Birkelund, 2013-02-06 Emphasizes unsolved issues and developments within class and stratification analysis, discussing both theoretical and methodological innovations and revisions. In this book, comparative analysis has also revealed cross-national differentiation in stratification processes, partly related to welfare state arrangements and national policies. **Northern Lights** Séamas Ó Catháin, 2001 Essays showing links between Ireland and Scandinavia in folklore and literature.

*The Northern Lights* Barbara Czarniawska-Joerges, Guje Sevón, 2003 **Skiing**, 1985-12 *Routledge Handbook of the Sociology of Higher Education* James E. Côté, 2016-06-03 This is the first handbook to cover the sociological approaches to higher education. It is timely because of global expansions of mass higher educational systems, especially as these systems come under scrutiny by a variety of stakeholders. Questions are being raised about the value of traditional pedagogies along with calls for efficiency, accountability, and cost reduction, but above all, job training. Within this neoliberal context, each chapter examines different sociological aspects of and debates about educational institutions as status-conferring organizations with myriad positional characteristics, experiences, and outcomes. Many current debates concern the legitimacy of the statuses conferred, including the continuing debate regarding the role of universities in legitimating social class reproduction as well as more recent concerns about standards in mass systems. This handbook puts these issues and debates in focus in ways that will be of interest to a variety of stakeholders within academia as well as in policy circles. **Accounting in Scandinavia** Sten A.
