Handbook of Research on Smart Technology Models for Business and Industry Thomas, J. Joshua, Fiore, Ugo, Lechuga, Gilberto Perez, Kharchenko, Valeriy, Vasant, Pandian, 2020-06-19 Advances in machine learning techniques and ever increasing computing power has helped create a new generation of hardware and software technologies with practical applications for nearly every industry As the progress has in turn excited the interest of venture investors technology firms and a growing number of clients implementing intelligent automation in both physical and information systems has become a must in business Handbook of Research on Smart Technology Models for Business and Industry is an essential reference source that discusses relevant abstract frameworks and the latest experimental research findings in theory mathematical models software applications and prototypes in the area of smart technologies Featuring research on topics such as digital security renewable energy and intelligence management this book is ideally designed for machine learning specialists industrial experts data scientists researchers academicians students and business professionals seeking coverage on current smart technology models Building Machine Learning Systems with a Feature Store Jim Dowling, 2025-11-06 Get up to speed on a new unified approach to building machine learning ML systems with a feature store Using this practical book data scientists and ML engineers will learn in detail how to develop and operate batch real time and agentic ML systems Author Jim Dowling introduces fundamental principles and practices for developing testing and operating ML and AI systems at scale You ll see how any AI system can be decomposed into independent feature training and inference pipelines connected by a shared data layer Through example ML systems you ll tackle the hardest part of ML systems the data learning how to transform data into features and embeddings and how to design a data model for AI Develop batch ML systems at any scale Develop real time ML systems by shifting left or shifting right feature computation Develop agentic ML systems that use LLMs tools and retrieval augmented generation Understand and apply MLOps principles when developing and operating ML systems **Introduction to High Performance Scientific Computing** Victor Eijkhout, 2010 This is a textbook that teaches the bridging topics between numerical analysis parallel computing code performance large scale applications

Programming Heterogeneous Hardware via Managed Runtime Systems Juan Fumero, Athanasios Stratikopoulos, Christos Kotselidis, 2024-04-10 This book provides an introduction to both heterogeneous execution and managed runtime environments MREs by discussing the current trends in computing and the evolution of both hardware and software To this end it first details how heterogeneous hardware differs from traditional CPUs what their key components are and what challenges they pose to heterogenous execution The most ubiquitous ones are General Purpose Graphics Processing Units GPGPUs which are pervasive across a plethora of application domains ranging from graphics processing to training of AI and Machine Learning models Subsequently current solutions on programming heterogeneous MREs are described highlighting for each current existing solution the associated advantages and disadvantages This book is written for scientists and

advanced developers who want to understand how choices at the programming API level can affect performance and or programmability of heterogeneous hardware accelerators how to improve the underlying runtime systems in order to seamlessly integrate diverse hardware resources or how to exploit acceleration techniques from their preferred programming languages

Principles of Performance and Reliability Modeling and Evaluation Lance Fiondella, Antonio Puliafito, 2016-04-06 This book presents the latest key research into the performance and reliability aspects of dependable fault tolerant systems and features commentary on the fields studied by Prof Kishor S Trivedi during his distinguished career Analyzing system evaluation as a fundamental tenet in the design of modern systems this book uses performance and dependability as common measures and covers novel ideas methods algorithms techniques and tools for the in depth study of the performance and reliability aspects of dependable fault tolerant systems It identifies the current challenges that designers and practitioners must face in order to ensure the reliability availability and performance of systems with special focus on their dynamic behaviors and dependencies and provides system researchers performance analysts and practitioners with the tools to address these challenges in their work With contributions from Prof Trivedi s former PhD students and collaborators many of whom are internationally recognized experts to honor him on the occasion of his 70th birthday this book serves as a valuable resource for all engineering disciplines including electrical computer civil mechanical and industrial engineering as well as production and manufacturing

**Storage Systems** Alexander Thomasian, 2021-10-13 Storage Systems Organization Performance Coding Reliability and Their Data Processing was motivated by the 1988 Redundant Array of Inexpensive Independent Disks proposal to replace large form factor mainframe disks with an array of commodity disks Disk loads are balanced by striping data into strips with one strip per disk and storage reliability is enhanced via replication or erasure coding which at best dedicates  $k$  strips per stripe to tolerate  $k$  disk failures Flash memories have resulted in a paradigm shift with Solid State Drives SSDs replacing Hard Disk Drives HDDs for high performance applications RAID and Flash have resulted in the emergence of new storage companies namely EMC NetApp SanDisk and Purestorage and a multibillion dollar storage market Key new conferences and publications are reviewed in this book The goal of the book is to expose students researchers and IT professionals to the more important developments in storage systems while covering the evolution of storage technologies traditional and novel databases and novel sources of data We describe several prototypes FAWN at CMU RAMCloud at Stanford and Lightstore at MIT Oracle s Exadata AWS Aurora Alibaba s PolarDB Fungible Data Center and author s paper designs for cloud storage namely heterogeneous disk arrays and hierarchical RAID Surveys storage technologies and lists sources of data measurements text audio images and video Familiarizes with paradigms to improve performance caching prefetching log structured file systems and merge trees LSMs Describes RAID organizations and analyzes their performance and reliability Conserves storage via data compression deduplication compaction and secures data via encryption Specifies implications of storage technologies on performance and
