Goggins,Isa Jahnke,Volker Wulf,2013-05-13 This book is an edited volume of case studies exploring the uptake and use of computer supported collaborative learning in work settings This book fills a significant gap in the literature A number of existing works provide empirical research on collaborative work practices Lave Davenport 2005 the sharing of information at work Brown Duguid 2000 and the development of communities of practice in workplace settings Wenger 1998 Others examine the munificent variation of information and communication technology use in the work place including studies of informal social networks formal information distribution and other socio technical combinations found in work settings Gibson Cohen 2003 Another significant thread of prior work is focused on computer supported collaborative learning much of it investigating the application of computer support for learning in the context of traditional educational institutions like public schools private schools colleges and tutoring organizations Exciting new theories of how knowledge is constructed by groups Stahl 2006 how teachers contribute to collaborative learning reference to another book in the series and the application of socio technical scripts for learning is explicated in book length works on CSCL Book length empirical work on CSCW is widespread and CSCL book length works are beginning to emerge with greater frequency We distinguish CSCL at Work from prior books written under the aegis of training and development or human resources more broadly The book aims to fill a void between existing works in CSCW and CSCL and will open with a chapter characterizing the emerging application of collaborative learning theories and practices to workplace learning CSCL and CSCW research each make distinct and important contributions to the construction of collaborative workplace learning

Using Mobile Technologies in the Teaching and Learning of Mathematics Nigel Calder,Kevin Larkin,Nathalie Sinclair,2018-08-09 Mobile technologies influence the way that we interact with the world the way that we live We use them for communication entertainment information and research In education settings there has been substantial investment in mobile devices often without a concomitant investment in developing pedagogy and practices With mobile technologies evolving rapidly and the number of educational apps growing there is a need for research into how they facilitate mathematics learning Such research is of particular importance regarding how such devices may be used to open up new ways of envisaging mathematics and mathematics education and to help develop conceptual rather than procedural or declarative knowledge This volume draws upon international research and reports on a range of research projects that have incorporated mobile technologies for mathematics education It presents research on the use of mobile technologies such as iPads iPods iPhones Androids and Tablets across a diverse range of cultures year levels and contexts It examines the ways in which mobile technologies including apps might influence students

engagement cognition collaboration and attitudes through the reshaping of the learning experience In addition the book presents appropriate ways to integrate mobile technologies into teaching and learning programmes It is a significant reference book for those involved with teaching mathematics or using mobile technologies in education while also offering insights and examples that are applicable to the use of digital technologies in education generally
