# Critical reflections of postgraduate researchers on a collaborative interdisciplinary research project

Ben Purvis<sup>1</sup><sup>✉</sup>, Hannah Keding<sup>2</sup>, Ashley Lewis<sup>3</sup> & Phil Northall<sup>4</sup>

By employing a retrospective collaborative autoethnographic approach, this work aims to better understand how an interdisciplinary context shaped the authors' experiences of British academia during their PhD research. The authors bring together their individual observations and experiences to collectively interrogate and critically reflect on their position as postgraduate researchers (PGRs) on a collaborative interdisciplinary research project. These reflections are taken as a lens through which to interrogate the contemporary British university. Pre-existing tensions within the academy are characterised as 'asymmetries' along dimensions of risk, disciplinary hierarchy, and knowledge. It is argued that the authors' experience of uncertainty and precarity as junior academics stems principally from pre-existing structures within British academia, rather than the interdisciplinary environment in which they were immersed. By emphasising the role of the successfully trained doctoral candidate as an outcome itself, it is argued that indicators of success can be reframed, shifting the power asymmetry to place greater value on PGRs within the neoliberal academy. Highlighting the ambiguity of their convergent and divergent personal experiences, the authors suggest there is a need for a greater focus on the contested role of the PGR within the contemporary university system.

**"Bridging Boundaries: Multidisciplinary Research in Science, Commerce and Humanities"** Prof. (Dr.) M. K. Patil, 2024-04-21 Ray Bradbury's *Fahrenheit 451* depicts a dystopian society where technology particularly in the form of mass media and censorship plays a central role in controlling and manipulating the populace. However, the novel also explores the paradoxical relationship between technology and human connection, highlighting both its potential for liberation and its capacity for oppression. This research paper aims to analyze the multifaceted portrayal of technology in *Fahrenheit 451*, examining its role in fostering isolation and conformity while also exploring its subversive potential as a tool for resistance and introspection. Through a close reading of the novel's themes, characters, and narrative structure, this paper elucidates Bradbury's nuanced commentary on the complex interplay between technology, knowledge, and freedom.
