Introduction To Twitter Profits It s likely that you ve heard of Twitter and perhaps you ve even tried to become an active member of this incredibly popular information network With Twitter people within the community post what are referred to as tweets Tweets are short messages and updates that people send out to everyone who chooses to follow them Each time a tweet is submitted it shows up on the public timeline and is pushed down as other new tweets are circulated throughout the network And while Twitter requires consistent activity in order to really take full advantage of its incredible resources you can begin building a targeted list in little time while generating a massive following of those who are interested in receiving your updates Within the twitter community people who choose to add you as a contact are referred to as followers and similar to a mailing list each follower can be considered a lead This is yet another way that growing a twitter following is similar to building an effective mailing list Each follower you receive should be interested in the niche market you are catering to so building massive following bases isn t the way to go Instead you want to build QUALITY lists of followers that are genuinely interested in your broadcasts and likely to respond to your offers and messages Think about twitter in a similar way as you would when building a mailing list or newsletter base If you have 100 targeted leads who have decided to subscribe to your ezine and actively respond to your offers and on another list you have 1 000 leads who are not genuinely interested in what you are offering which list do you believe would produce the best results or will be easier to monetize

for a fairly automated way to build a brand online you don t have to look further than Twitter In fact for the longest time a lot of marketers and marketing companies have long considered Twitter as a great place for brand formation If you re looking for an online brand Twitter is a great place to start It s easy to see why Twitter is so easy to use You just need to post a tweet that is one hundred forty characters You need to do it long enough You must pick the right hashtags You must pick the right content and given enough focus and attention to detail you will get it right It s just a matter of time Of course this does not mean automatic success but with everything else being equal Twitter compared to other social media platforms is easier to master Why First it is very friendly to automation That s right You can automate pretty much everything you do on Twitter Therefore a lot of people use it to make money from the Internet on autopilot They don t have to babysit each tweet They don t have to sit around to figure out what s going on They can pretty much set a strategy let the software do it let the process run for some time double check their work make some adjustments here and there and then let it run In other words Twitter is one of those platforms that you just must figure out in broad terms to lay out an initial strategy Implement that strategy and then learn from your results **All a Twitter** Tee Morris,2009-06-29 Make Twitter work for you right now Twitter
