## **Logistic Optimization of Chemical**

**Production Processes** Sebastian Engell,2008-09-08 In this first book dedicated to the logistics of chemical plants and production processes authors from academia and industry such as Bayer Degussa Merck provide an overview of the field incorporating the knowledge and experience gathered over the last 10 years In so doing they describe the latest ideas on efficient design illustrating when to produce which part of the equipment and with which resources so as to optimize chemical plants for high capacity and flexibility This book gives an overview of the state of the art of the whole logistic chain of chemical production processes Alongside the fundamentals tools and algorithms and integration issues the book features five significant industrial case studies

## **Multiobjective Optimization** Jürgen Branke,Kalyanmoy Deb,Kaisa

Miettinen,Roman Slowiński,2008-10-18 Multiobjective optimization deals with solving problems having not only one but multiple often conflicting criteria Such problems can arise in practically every field of science engineering and business and the need for efficient and reliable solution methods is increasing The task is challenging due to the fact that instead of a single optimal solution multiobjective optimization results in a number of solutions with different trade offs among criteria also known as Pareto optimal or efficient solutions Hence a decision maker is needed to provide additional preference information and to identify the most satisfactory solution Depending on the paradigm used such information may be introduced before during or after the optimization process Clearly research and application in multiobjective optimization involve expertise in optimization as well as in decision support This state of the art survey originates from the International Seminar on Practical Approaches to Multiobjective Optimization held in Dagstuhl Castle Germany in December 2006 which brought together leading experts from various contemporary multiobjective optimization fields including evolutionary multiobjective optimization EMO multiple criteria decision making MCDM and multiple criteria decision aiding MCDA This book gives a unique and detailed account of the current status of research and applications in the field of multiobjective optimization It contains 16 chapters grouped in the following 5 thematic sections Basics on Multiobjective Optimization Recent Interactive and Preference Based Approaches Visualization of Solutions Modelling Implementation and Applications and Quality Assessment Learning and Future Challenges
