Nursing Drug Calculations Australia:

A Guide for International Nursing Students in Australia and New Zealand - E-Book Bernadette Hally, 2008-11-01 Please note that this eBook does not include the DVD accompaniment. If you would like to have access to the DVD content, please purchase the print copy of this title. This new book is an essential resource for overseas nurses and international students studying nursing in Australia and New Zealand. It provides clear, concise information about health care and nursing practice in our region and assists the reader to develop essential communication skills for practice. Pharmacology in Nursing Gayle McKenzie, Bonita Broyles, Mary E. Evans, Rachel Page, Susan Pleunik, Barry S. Reiss, 2016-10-05 Focuses on the use of drugs as medications within the healthcare environment in Australia and New Zealand. We use the term medication rather than drug throughout this book to refer to any drug that is used in the healthcare context, although the terms are generally interchangeable and it is the generic name of a medication that does not change and is the essential name for the nurse to know. We also introduce some abbreviations that are commonly used by healthcare providers and pharmacists in writing and preparing medication prescriptions. Two new chapters have been included in the second edition. One chapter covers pharmacogenetics and pharmacogenomics, an area of growing interest in personalised medicine, and the other covers legal and ethical issues related to the administration of medications. **Medication Mathematics** Karen

Glaister, 1997 This resource for student nurses contains clinically oriented dosage calculations. It is divided into modules with categories such as intravenous therapy calculations and paediatric dosage calculations. Refers to medications and equipment commonly used in Australia with drug information conforming to Australian standards. The author has 20 years experience in the nursing profession and is involved in nursing education at Curtin University of Technology. **Pharmacology in**

Pharmacology in Nursing focuses on the use of medications within the healthcare environment in Australia and New Zealand. Taking a body systems approach, this text is written specifically for nursing students and highlights the need for nurses to understand the science behind medications alongside clinical requirements for medication administration, safety, patient education, and dosage calculation. Medication tables provide an overview of important medication information, including indications, active ingredients, and nursing considerations. Practical and professional application boxes ensure that the theory is shown in context, and the text layout is appealing to the reader. Emphasis is placed on clinical reasoning, critical thinking, and evidence-based research. *Practice-driven Research* Tracey McDonald, 2019-06-01 In this ground-breaking book,

Professor Tracey McDonald, RSL LifeCare Chair of Ageing at the Australian Catholic University, explores some of the many issues arising from an ageing population, ageing veterans, and community health. Many of the projects presented in the book have been awarded Better Practice Awards by the Australian Government and provide inspiration to aged care service providers keen to improve their services. Professor McDonald has developed practice-driven research, an approach that fully

involves clinical nurses and carers in striving to understand the work they are doing and to improve on it This approach has been developed in collaboration with the clinical nurses therapists and managers at RSL LifeCare and addresses the issues of relevance and appropriateness of research in solving practical day to day problems within the Aged Care setting It will appeal to all involved with the aged care industry particularly managers and leaders at all levels and also bridges the theory practice gap by providing an overview of practice driven research for health sciences students within the Australian University environment
