is an excellent text for all students embarking on the last stages of their journey to become a Registered Nurse. It offers great advice and guidance that will inform and help boost confidence during the final year of the programme and beyond. The logical structure of the contents and use of case study scenarios allows the reader to develop their understanding of the important aspects of theory and practice requirements at Level 6 and the expectations and reality of life as a Newly Qualified Nurse. This is essential reading for all final year students. Claire Williams Senior Lecturer University of Derby UK. Much has been written about transition to practice for newly qualified nurses. Bill and Michelle have done a fantastic job in putting this in one place and producing a valuable resource for student nurses to help them prepare for this part of their journey to registered professional. They have covered all the important elements of transition including resilience, speaking out, developing confidence and dealing with reality shock, culminating in a very handy toolkit that can be used to help manage this exciting and sometimes stressful time. Claire Agnew Senior Nurse Clinical Practice Development University Hospitals of Leicester NHS Trust UK.

**Dimensions on Nursing Teaching and Learning** Sheila Cunningham, 2020-03-18. The book presents five significant areas of learning within professional programmes of preparation most applicable to student nurses and midwives in their pre-registration education but also with relevance to other learners on healthcare related disciplines. This volume has emerged from several sources: the editor's role as a Director for Learning and Teaching in Adult Child Nursing and Midwifery and also from an EU funded project looking at quality benchmarks and assuring clinical learning environments. HEALINT, The Francis Report (Francis 2013) and the Shape of Caring Report (Willis 2015) highlighted challenges related to practice learning and mark a renewed focus in its overall significance. Morley et al (2017). In addition to discussions regarding models of support in practice, there is also a clear emphasis on the need for nurses to have the knowledge and skills to undertake more flexible roles and an increasing requirement for nurses to have higher order knowledge and skills at the point of registration according to the UK Nursing and Midwifery Council (NMC) 2017. The book will meet these new educational needs especially for educators working in nurse and midwife colleges. The new standards of proficiency for pre-registration nursing were published in 2018 with all higher education institutions (HEIs) approved to deliver the programme from September 2019. This creates a demand for a publication which explores the potential impact of a new education approach and issues with preparation, teaching and learning for nurses and the breadth and dimensions of teaching and learning. NMC proposed roles of Practice Supervisor, Practice Assessor and Academic Assessor will not have a prescribed preparation programme and universities and practice partners will be seeking guidance and direction in developing local programmes of preparation.
