It incorporates concepts from many different fields including microbiology, chemical engineering, and biochemistry. Nutrition science investigates the metabolic and physiological responses of the body to diet. With advances in the field of molecular biology, biochemistry, and genetics, the study of nutrition is increasingly concerned with metabolism and metabolic pathways, the sequences of biochemical steps through which substances in living things change from one form to another. Food Science and Nutrition is a comprehensive textbook that is specially designed to meet the needs of students of hospitality studies, hotel management, and catering technology. Food Science and Nutrition provides comprehensive coverage of all aspects of the food, nutrition, and human health. The purpose of this book is to offer its readers a thoroughly adequate and up-to-date view of the food science and nutrition. Foods science and their nutritive value. With the development of the work, there has been a need for a text book presenting in concise form the composition and physical properties of foods and discussing some of the main factors which affect their nutritive value. This book has been written so as to serve the purpose of equipping readers with all that entails the science of handling food in a technical and scientific manner and retaining its nutritive qualities. The book begins with an all-round look into the intricacies of food science, what it carries, the techniques and principles underlying it, the development of foods, the disciplines and aspects of food involved, etc.
