Occupational Health Nurse Triage Guide:

Basic Occupational Medicine A Guide to Developing Delivery Systems Robert R. Silver, 1991-05-02 A book based on decades of occupational health experience in the industrial clinic setting. This book focuses on the development and administration of independent facilities or departments devoted to the injured worker. Until recently this area was a largely ignored aspect of occupational health. Now solo practitioners, partnerships small and large, multispecialty groups, HMOs and hospitals are showing tremendous interest in developing single purpose facilities or divisions related to this type of practice. *Basic Occupational Medicine A Guide to Developing Delivery Systems* addresses the critical need for a guide that explains startup considerations, maintaining the operation and caring for patients. Topics discussed include proper reporting and charting the nature of examinations and screening, the role of the Physician's Assistant working with plant nurses and maintaining relationships with physicians in other departments and the community. A special section is devoted to starting up and operating a facility including critical information such as advertising and marketing, staffing, equipment and site location. The book also contains an index with samples of types of forms needed for this business. *Basic Occupational Medicine A Guide to Developing Delivery Systems* will benefit administrators, hospital directors, group medical directors, urgent care center directors, physician's assistants, occupational health nurses, insurance carriers and employers involved with industrial health clinics.

Essentials for Occupational Health Nursing Arlene Guzik, 2013-02-08 The scope of occupational health nursing practice has expanded and taken on a variety of roles giving rise to opportunities for nurses to care for workers in various workplace settings. *Essentials for Occupational Health Nursing* provides a highly practical and accessible guide for nurses entering or already engaged in this important field. The text begins with the foundations for occupational health practice covering the domain of occupational health and the role of the many professionals within the specialty. Subsequent chapters address program development, professional development, workplace regulatory requirements, workplace injury management and managing health and productivity. Case studies pertaining to fitness for duty and medical monitoring provide real life scenarios to aid in learning. This title is also available as a mobile App from MedHand Mobile Libraries. Occupational Health Nursing, 1983 [Occupational Health Services](#) Tee L. Guidotti, 2013. Workers and their families, employers and society as a whole benefit when providers deliver the best quality of care to injured workers and when they know how to provide effective services for both prevention and fitness for duty and understand why instead of just following regulations. Designed for professionals who deliver, manage and hold oversight responsibility for occupational health in an organization or in the community. *Occupational Health Services* guides the busy practitioner and clinic manager in setting up, running and improving healthcare services for the prevention, diagnosis, treatment and occupational management of work related health issues. The text covers an overview of occupational health care in the US and Canada, how it is organized, who pays for what, how it is regulated and how workers' compensation

works how occupational health services are managed in practice whether within a company as a global network in a hospital or medical group practice as a free standing clinic or following other models management of core services including recordkeeping marketing service delivery options staff recruitment and evaluation and program evaluation depth and detail on specific services including clinical service delivery for injured workers periodic health surveillance impairment assessment fitness for duty alcohol and drug testing employee assistance mental health health promotion emergency management global health management and medico legal services This highly focused and relevant combined handbook and textbook is aimed at improving the provision of care and health protection for workers and will be of use to both managers and health practitioners from a range of backgrounds including but not limited to medicine nursing health services administration and physical therapy
