Revolutionizing EFL Learning. Integrating Podcasts to Enhance

Communicative, Intercultural, and Media Literacy Skills Jessica Büscher, 2024-07-22 Master's Thesis from the year 2022 in the subject Didactics for the subject English Pedagogy Literature Studies grade 1 0 University of Paderborn language English abstract This paper explores how podcasts can revolutionize learning in the EFL English as a foreign language classroom Not only are podcasts easily accessible and transcend knowledge barriers but they also foster close knit communities and offer a variety of genres and formats Although increasingly popular with young adults their potential often remains untapped in schools This study aims to show how teachers can use podcasts effectively in the classroom to promote communicative intercultural and media literacy skills With concrete application examples and creative teaching concepts we want to give teachers the tools to integrate podcasts profitably into EFL lessons and thus make learning more exciting and interactive Bloomberg Businessweek, 2010-04 **Vanity Fair**, 2016 Parliamentary Debates (Hansard). Great Britain. Parliament. House of Commons, 2013 *Show me your playlist and I tell you who you are* Kathrin Rochow, 2012-11-28 Bachelor Thesis from the year 2010 in the subject Psychology Social Psychology grade 1 0 Uppsala University language English abstract In the age of social networking and music streaming playlists are a common tool for organizing sharing or exchanging music in the digital realm Most research however emphasizes mainly political legal and ethical constraints of music sharing practices yet neglects their social impact Thus this paper investigates the social psychological foundation of the playlist and analyses its functionality in establishing social relations and communication Following the theories of Cooley Mead Simmel and Solomon I conducted and analysed interviews with young Swedish men and women in which they talked about their experiences and attitudes towards playlists Moreover all participants compiled their own personal playlist based on certain personality traits which were aimed to be recognized by the others during the focus group discussion The analysis of the data yields the following conclusions The playlist is a social object facilitating new forms of communication The social nature of the playlist is based on the transformation from objective into subjective culture By internalizing new technologies such as the playlist objects gain social value thus mere musical content becomes a social form It is through sharing and exchanging musical compilations that the playlist as a social form serves as a vehicle or medium facilitating new forms of sociation and communication The communicative function of the playlist is due to its construction through emotions as uniquely subjective judgements based on the I as an emotional self feeling Thus musical compilations take part in the self construction process and can serve as a tool for the symbolic expression of the self Moreover the analysis points out that there are differences in how well certain parts of the self can be communicated by a playlist Emotional expressions of the self are translated into particular universal music patterns most successfully Furthermore the analysis shows that some people like to browse through the playlists of others and judge them thereupon which results in some type of musical voyeurism termed playlistism In conclusion I argue that the musical playlist is both socially implicated and socially implicating **A New Approach for Developing Business Model Innovation** Michael

Lang, Annika Koerdt, 2019-12-30 Research Paper postgraduate from the year 2019 in the subject Business economics
Company formation Business Plans grade 1 0 Mendel University Business and Economics language English abstract Business
model innovation has received increasing interest within science and managerial practice over the last years Accordingly
scientists have developed various approaches on business model innovation However it has been recognized that established
companies face particular challenges successfully innovating their business model Current academic research considers the
company's established dominant logic to be the main barrier hindering the innovation process In contrast to that none of
current theories on business model innovation covers the overcoming of the dominant logic in their approaches The research
gap leads to the question how does a new approach for business model innovation look like which support today's
companies in their current and future challenges To answer this question Chapter 1 highlights the need for action Based on
that Chapter 2 deals with the theory of business model innovation and dominant logic Chapter 4 highlights the research gap
reflecting on the role of dominant logic within business model innovation Chapter 5 aims at developing the according
strategy which acknowledges and effectively addresses the innovation barrier of the dominant logic Finally the last Chapter
summarizes the findings how the new academic approaches on business model innovation is characterized and discuss the
validation of the new theory Introduction to Information Systems R. Kelly Rainer, Brad Prince, 2020-06-11 Introduction to
