Current Topics in Zika Alfonso J. Rodriguez-Morales, 2018-06-13 Zika was an arbovirus not considered relevant until the epidemics of 2007 where in the islands of the Pacific Yap Micronesia and others and later in the Americas in 2015 2016 it created a significant public health threat Zika is a flavivirus that has been especially important not just for the high number of cases but also for its related morbidity In the case of adult population multiple neurological diseases are already associated and in pregnant women because of its confirmed teratogenic capacity leading to microcephaly as well as other central nervous system CNS birth defects This book tried to update the significant epidemiological and clinical research in many aspects with a multinational perspective

Chronicles of Care: A Design History of the COVID-19 Virus Paul A. Rodgers, Fernando Galdon, Craig Bremner, 2024-04-16 The Covid 19 crisis and the designed interventions that the authors have catalogued in this book prove definitively that design does care The authors documented this as it evolved every day from the 1st January 2020 to 31st May 2020 inclusive Then they looked at all of this care and caring from the point of view of design and by the sheer volume of design interventions they have documented illustrate that design is good in a crisis What the Covid 19 pandemic illustrated is that for the first time in modern history capital was totally irrelevant Money could not save your life Only design could Rapidly designed masks shelters hospitals instructional posters infographics dashboards respirators sanitisers virtual and local communities emerged to save us From January 2020 design became king The Covid 19 global pandemic presented an ontological reality design is more than margins or profit In fact design became extremely valuable when it stopped concentrating on those things and started to care about peoples lives This brief episode in history is still repositioning the status of design and reconfiguring its signifier from consumption to care The contents of this book cover the outbreak lockdown and the beginning of the reopening in the UK In between the book functions as a history of pandemic crisis design interventions As such it is a research in the moment project where we have illustrated our thoughts and insights in tables charts and diagrams We have accepted all design interventions as valid and given them the same role and status by presenting each of them in a standard format No curation No selection No position The task of critical analysis must follow perhaps by us certainly by others

web good question the answer to a problem like this is usually written as the square root of the number for example if we had an equation like $x^2 = 57$ where the square root of 57 would be the value for x then it's normally written $\sqrt{57}$ use the quadratic formula to solve the equation 0 is equal to negative $7q$ squared plus $2q$ plus 9 now
