Esports Law and Practice Leonid Shmatenko, Oleksandr Volkov, Rodolphe Ruffié-Farrugia, 2025-05-14 Esports Law and Practice serves as an authoritative guide to the fast growing field of esports law. It covers all aspects of this intricate and dynamic sector exploring the history and evolution of its legal landscape. The book provides practical insights into the challenges and opportunities that lie ahead in the world of esports.

The Legal Singularity Abdi Aidid, Benjamin Alarie, 2023-06-26 Law today is incomplete, inaccessible, unclear, underdeveloped, and often perplexing to those whom it affects. In *The Legal Singularity* Abdi Aidid and Benjamin Alarie argue that the proliferation of artificial intelligence enabled technology and specifically the advent of legal prediction is on the verge of radically reconfiguring the law, our institutions, and our society for the better. Revealing the ways in which our legal institutions underperform and are expensive to administer, the book highlights the negative social consequences associated with our legal status quo. Given the infirmities of the current state of the law and our legal institutions, the silver lining is that there is ample room for improvement. With concerted action, technology can help us to ameliorate the problems of the law and improve our legal institutions. Inspired in part by the concept of the technological singularity, *The Legal Singularity* presents a future state in which technology facilitates the functional completeness of law where the law is at once extraordinarily more complex in its specification than it is today and yet operationally the law is vastly more knowable, fairer, and clearer for its subjects. Aidid and Alarie describe the changes that will culminate in the legal singularity and explore the implications for the law and its institutions.

Private Enforcement of EU Competition Law and Class Actions Silvia Venda, 2025-12-03 International Competition Law Series. While the right to seek compensation for damages caused by breaches of competition rules is firmly established in EU law, its exercise remains out of reach for many, particularly small and medium-sized enterprises (SMEs) and consumers, the very groups most in need of protection. Highlighting the persistent challenges that have hindered its effectiveness, this book explores the historical and legal context of private enforcement, analyses the scope of the EU Damages Directive and makes a strong case for EU level legislation on collective redress in competition law. Silvia Venda clearly demonstrates how the absence of robust collective mechanisms in this area hinders access to redress due to the monetary, legal, and cultural barriers that beset isolated damages claims. In other words, the author unpacks the reasons why private enforcement of EU competition law continues to fall short. She does so by examining such key elements as the following: the principles of effectiveness and equivalence, right to compensation, types and models of class actions, legal standing, disclosure of evidence, punitive damages, cost allocation, third party and public funding, quota litis or contingency fee agreements, and the remuneration of representative entities. A comparative study of four jurisdictions (Portugal, the United Kingdom, Belgium, and France) offers valuable insights into diverse approaches to collective redress and the lessons they provide. Both a diagnosis of the current shortcomings and a call to action for a more accessible and equitable system of redress, the book identifies ten

key factors that influence the success or stagnation of antitrust class actions across the EU It concludes with a six point legislative proposal designed to harmonise collective enforcement in this area without replicating the US model but rather respecting core Member States principles Whether you are an academic practitioner policymaker or advocate it will demystify complex procedures and funding options empower you to act decisively in overcoming barriers to compensation in competition law cases and advance access to justice *The Multimedia and CD-ROM Directory* ,1997 Connected
