

Nursing MATH

Complete essentials for the student or professional math basics, measurement conversions, dosage calculations, vital signs, body-related calculations, health care operating indicators, condition specific calculations & calculating risk.

BASICS

Positive & Negative Numbers

- **Positive numbers** are greater than 0 (to the right of 0 on a number line) and get larger as you move farther away from 0; they may be written with or without a + sign (EQ: 4 or +4)
- **Negative numbers** are less than 0 (to the left of 0 on a number line) and get smaller as you move farther away from 0; they must be written with a - sign (EQ: -5)

RULES FOR ADDITION

- The sum of two positive numbers is a positive number
EQ: $3 + 4 = 7$
- The sum of two negative numbers is a negative number
EQ: $-2 + -6 = -8$
- The sum of one positive number and one negative number may be positive or negative, depending on which is larger, but remember that adding a negative number is the same as subtracting that number
EQ: $9 + (-2) = 9 - 2 = 7$ $-9 + 2 = 2 - 9 = -7$

RULES FOR SUBTRACTION

- Think of subtraction as addition of the opposite; so, first change the subtraction sign to an addition sign, and write the opposite of the original number being subtracted and solve as usual
EQ: $3 - 8 = 3 + (-8) = -5$ $5 - (-2) = 5 + 2 = 7$

RULES FOR MULTIPLICATION

- The product of two positive numbers is a positive number
EQ: $3 \times 4 = 12$
- The product of two negative numbers is a positive number
EQ: $(-3) \times (-4) = 12$
- The product of one positive number and one negative number is a negative number
EQ: $4 \times (-7) = -28$

RULES FOR DIVISION

- The quotient of two positive numbers is a positive number
EQ: $9 \div 3 = 3$
- The quotient of two negative numbers is a positive number
EQ: $(-20) \div (-4) = 5$
- The quotient of one positive number and one negative number is a negative number
EQ: $40 \div (-5) = -8$ $(-20) \div 4 = -5$

DISTRIBUTIVE PROPERTY

- A rule used in mathematics states that $a(b + c) = ab + ac$, or that $a(b - c) = ab - ac$; in other words, the first term outside the parentheses must be distributed to, or multiplied by, each term inside the parentheses.
Remember to use the rules for multiplying negative and positive numbers if negative numbers are included in the expression
EQ: $5(-1 - 2) = 5 \times -1 + 5 \times -2 = -5 - 10 = -15$ $-6(-1 + 3) = 6 \times -1 + 6 \times 3 = -6 + 18 = 12$

Fractions

- Fractions represent parts of a whole; they are another way of showing division
- The top number is called the **numerator**, and the bottom number is called the **denominator**
- There are three types of fractions:
 - **Proper fraction:** The numerator is less than the denominator: $\frac{1}{2}$
 - **Improper fraction:** The numerator is greater than or equal to the denominator: $\frac{7}{3}$
 - **Mixed number:** Consists of a whole number and a fraction part: $1\frac{1}{2}$
- **Lowest terms:** Putting a fraction in a form so that the only common factor between the numerator and denominator is 1; also called **reducing a fraction** or writing it in **reduced form**
EQ: $\frac{6}{12}$: the numerator and denominator have a common factor of 6, so divide each by 6 to put it in lowest terms: $\frac{1}{2}$; now the only common factor is 1, so this is lowest terms

NOTE: Fractions that have the same value (e.g., a fraction and that same fraction in lowest terms) are called **equivalent fractions**

FINDING THE LEAST COMMON DENOMINATOR (LCD)

- The LCD is the smallest number into which two or more denominators will divide evenly; this number is useful for performing operations (especially addition) subtracted with fractions
EQ: Given the fractions $\frac{1}{3}$ and $\frac{1}{4}$, what is the LCD?
Think about the smallest number that is divisible by both 3 and 4; in this case, it is $3 \times 4 = 12$, so multiply each of the numerators and denominators by whatever is needed to make each denominator equal to 20:
 $\frac{1}{3} \times \frac{4}{4} = \frac{4}{12}$ and $\frac{1}{4} \times \frac{3}{3} = \frac{3}{12}$. The LCD is 12

ADDING FRACTIONS

- If the fractions have the **same denominator**:
 1. Add the numerators; the denominator stays the same
 2. Write the fraction in reduced form, if necessary
EQ: $\frac{1}{3} + \frac{2}{3} = \frac{1+2}{3} = \frac{3}{3}$; since the numerator and denominator are both divisible by 3, reduce the fraction: $\frac{3}{3} = 1$
- If the fractions have **different denominators**:
 1. Find the LCD and write equivalent fractions for each fraction using the LCD
 2. Add the numerators; the denominator stays the same
 3. Write the fraction in reduced form, if necessary
EQ: $\frac{1}{3} + \frac{1}{4}$: the LCD is 12, so rewrite equivalent fractions with a denominator of 12: $\frac{1}{3} \times \frac{4}{4} = \frac{4}{12}$ and $\frac{1}{4} \times \frac{3}{3} = \frac{3}{12}$; then add the numerators: $\frac{4+3}{12} = \frac{7}{12}$; since it can be reduced by writing as a mixed number: $\frac{7}{12} = 1\frac{7}{12}$

SUBTRACTING FRACTIONS

- If the fractions have the **same denominator**:
 1. Subtract the numerators; the denominator stays the same
 2. Write the fraction in reduced form, if necessary
EQ: $\frac{5}{12} - \frac{3}{12} = \frac{5-3}{12} = \frac{2}{12}$; since the greatest common factor of the numerator and denominator is 2, the fraction is already in reduced form
- If the fractions have **different denominators**:
 1. Find the LCD and write equivalent fractions for each fraction using the LCD
 2. Subtract the numerators; the denominator stays the same
 3. Write the fraction in reduced form, if necessary
EQ: $\frac{3}{4} - \frac{1}{2}$: the LCD is 4, so rewrite equivalent fractions with a denominator of 4: $\frac{3}{4} \times \frac{1}{1} = \frac{3}{4}$ and $\frac{1}{2} \times \frac{2}{2} = \frac{2}{4}$; then subtract the numerators: $\frac{3-2}{4} = \frac{1}{4}$; since the greatest common factor of the numerator and denominator is 1, the fraction is already in reduced form

MULTIPLYING FRACTIONS

- 1. Write all numbers (even whole numbers or mixed numbers) in fraction form
- 2. Multiply the numerators, then multiply the denominators
- 3. Write the results in fraction form, then write the fraction in reduced form
EQ: $\frac{1}{2} \times 2\frac{1}{2}$: first, write all numbers in fraction form: $\frac{1}{2} \times \frac{5}{2}$; then multiply the numerators: $1 \times 5 = 5$; then multiply the denominators: $2 \times 2 = 4$; then write the results in fraction form: $\frac{5}{4}$; and finally reduce, since each number is divisible by 4, divide each by 4: $\frac{5}{4} = 1\frac{1}{4}$

DIVIDING FRACTIONS

- 1. Write all numbers (even whole numbers or mixed numbers) in fraction form
- 2. Change the division sign to a multiplication sign
- 3. Write the **reciprocal** of the second fraction (reciprocals are found by inverting, or flipping, the fraction, so that the numerator is on the bottom and the denominator is on the top)
- 4. Multiply the numerators, then multiply the denominators
- 5. Write the results in fraction form, then write the fraction in reduced form
EQ: $\frac{3}{4} \div \frac{2}{5}$: the numbers are both already in fraction form, so change the division sign to a multiplication sign and write the reciprocal of the second fraction: $\frac{3}{4} \times \frac{5}{2}$; then multiply the numerators: $3 \times 5 = 15$; multiply the denominators: $4 \times 2 = 8$; then write the results in fraction form: $\frac{15}{8}$, or as a mixed number: $1\frac{7}{8}$

CONVERTING FRACTIONS TO DECIMALS

- 1. Write all numbers (even whole numbers or mixed numbers) in fraction form
- 2. Divide the numerator by the denominator, and add a zero in front of the decimal point, if necessary
EQ: $1\frac{1}{2}$: since it is a mixed number, write it in fraction form: $\frac{3}{2}$; then divide 12 by 10 to get 1.2; since there is already a number in the tenths of the decimal point, there is no need to write the zero in front of it

CONVERTING FRACTIONS TO PERCENTAGES

- 1. Convert the fraction to a decimal (as explained above)
- 2. Round the decimal to the nearest hundredth
- 3. Multiply by 100 and add the percent sign (%)
EQ: $\frac{3}{4}$: it is already in fraction form, so just divide 3 by 4 to get 0.75; then multiply by 100 and add the percent sign: 75%

Nursing Math Quick Study Academic

Raffaela Di Napoli

Nursing Math Quick Study Academic:

Nursing Math BarCharts, Inc, 2011-05-31 Takes the mystery out of the different forms of math that are crucial to the nursing field Each page is jam packed with mathematical equations and formulas their definitions and step by step instructions on how to perform each one helpful charts and tables are also included Topics covered include Basics Measurement Conversions Pharmacologic Abbreviations Dosage Calculations Vital Signs Body Related Calculations and more

Nursing Math Quick Study Academic Introduction

Nursing Math Quick Study Academic Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Nursing Math Quick Study Academic Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Nursing Math Quick Study Academic : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Nursing Math Quick Study Academic : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Nursing Math Quick Study Academic Offers a diverse range of free eBooks across various genres. Nursing Math Quick Study Academic Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Nursing Math Quick Study Academic Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Nursing Math Quick Study Academic, especially related to Nursing Math Quick Study Academic, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Nursing Math Quick Study Academic, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Nursing Math Quick Study Academic books or magazines might include. Look for these in online stores or libraries. Remember that while Nursing Math Quick Study Academic, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Nursing Math Quick Study Academic eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Nursing Math Quick Study Academic full book , it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Nursing Math Quick Study Academic eBooks, including some popular titles.

FAQs About Nursing Math Quick Study Academic Books

What is a Nursing Math Quick Study Academic PDF? A PDF (Portable Document Format) is a file format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system used to view or print it. **How do I create a Nursing Math Quick Study Academic PDF?** There are several ways to create a PDF: Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF. **How do I edit a Nursing Math Quick Study Academic PDF?** Editing a PDF can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities. **How do I convert a Nursing Math Quick Study Academic PDF to another file format?** There are multiple ways to convert a PDF to another format: Use online converters like Smallpdf, Zamzar, or Adobe Acrobat's export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats. **How do I password-protect a Nursing Math Quick Study Academic PDF?** Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file? You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
