**Resources in Education** ,1988      **Kaplan No-Stress Guide to the New York State 8th Grade Tests** Cynthia Johnson,Drew Johnson,2001 Vincent Descombes brings together an astonishingly large body of philosophical and anthropological thought to present a thoroughgoing critique of contemporary cognitivism and to develop a powerful new philosophy of the mind Beginning with a critical examination of American cognitivism and French structuralism Descombes launches a more general critique of all philosophies that view the mind in strictly causal terms and suppose that the brain and not the person thinks Providing a broad historical perspective Descombes draws surprising links between cognitivism and earlier anthropological projects such as Levi Strauss s work on the symbolic status of myths He identifies as incoherent both the belief that mental states are detached from the world and the idea that states of mind are brain states these assumptions beg the question of the relation between mind and brain In place of cognitivism Descombes offers an anthropologically based theory of mind that emphasizes the mind s collective nature Drawing on Wittgenstein he maintains that mental acts are properly attributed to the person not the brain and that states of mind far from being detached from the world require a historical and cultural context for their very intelligibility Available in English for the first time this is the most outstanding work of one of France s finest contemporary philosophers It provides a much needed link between the continental and Anglo American traditions and its impact will extend beyond philosophy to anthropology psychology critical theory and French studies      **Resources in Education** ,1997      **The New York Times Book Review** ,1969-04
