**Step by Step** Sanja Kupesic Plavsic, 2014 **Clinical Cases in Obstetrics, Gynaecology and Women's Health**

Caroline de Costa, Stephen Robson, Boon Lim, 2013 An updated edition for our popular Clinical Cases collection, this book is aimed at medical students following the core curriculum in Australia and New Zealand and the United Kingdom, junior doctors at resident or house officer level and general practitioners. This handy lab coat pocket sized book broadly covers the whole syllabus for the medical student and the whole range of obstetric and gynaecological problems likely to come into the path of the busy junior hospital doctor or general practitioner, but it is not a textbook providing simply a list of differential diagnoses and treatments. The approach has been developed from the experienced authors' teaching of problem based learning scenarios (PBLs) to clinical students. PBLs introduce students to typical clinical situations and then encourage those students to think about how they would take appropriate histories, examine, investigate and finally treat their patients. In this book, by using case histories that are more developed and complex, we aim to show readers in greater detail how women may present with particular conditions and demonstrate what should take place in the way of consultation, investigations and treatment. However, by questioning our readers as we go along, we also hope to encourage them to think about why they would choose a certain clinical course of action and to base their decisions firmly on

current scientific evidence In addition to the purely clinical aspects of the cases the emotional social and psychological aspects of the care of each woman is described Each of the 50 case histories commences with a straightforward description following a woman through the clinical presentation of a particular condition Along the way important points in clinical examination and diagnosis complications investigations and management are incorporated into the text as a conversation with the reader and essential points are highlighted in boxes Being an Australian author team tips are included for those junior doctors faced with obstetric or gynaecological problems in a smaller metropolitan or rural setting facilities for care and the advice of senior practitioners may be more limited in such surroundings and different care paths may be more appropriate especially in remote parts of Australia An app with multiple choice questions is available through the App Store and Google Play Search DeCosta [http://www.slideshare.net/medicalmgh/decosta part 1 NEW Clinical Cases in Obstetrics Gynaecology and Women sHealth 2e Sample from McGraw HillEducation ANZ Medical](http://www.slideshare.net/medicalmgh/decosta-part-1-NEW-Clinical-Cases-in-Obstetrics-Gynaecology-and-Women-s-Health-2e-Sample) **Obstetrics and Gynaecology, eTextbook** Maggie Cruickshank,Ashalatha Shetty,2010-09-02 Featuring a range of commonly encountered and important conditionsin women s health *Obstetrics Gynaecology Clinical Cases Uncovered* allows the reader to understand normalreproductive physiology and anatomy in the context of clinicalpractice It highlights aspects of good practice which in real lifeare considered beyond the presenting symptom This unique case based approach allows the reader to progressthrough each stage gaining an understanding of the rationale forinvestigation and management and to consider other importantaspects for holistic care *Obstetrics Gynaecology Clinical Cases Uncovered* isideal for medical students and junior doctors obstetrics andgynaecology trainees midwives and nurse practitioners *Case Studies in Obstetrics and Gynecology* Frederick Jackson Stoddard,1964 Library of Congress Subject Headings Library of Congress,2005
