Research Anthology on Applying Social Networking Strategies to Classrooms and Libraries Management Association, Information Resources, 2022-07-08 The introduction of social media has given many communities the opportunity to connect and communicate with each other at a higher level than ever before Many organizations from businesses to governments have taken advantage of this important tool to conduct research and enhance efficiency Libraries and educational institutions have also made use of social media to enhance educational marketing engage with learning communities adapt educational tools and more The Research Anthology on Applying Social Networking Strategies to Classrooms and Libraries describes the applications tools and opportunities provided by the intersection of education and social media It also considers the ways in which social media encourages learner engagement and community participation Covering topics such as data collection online professional learning networks and reinforcement learning this major reference work is a dynamic resource for pre service teachers teacher educators faculty and administrators of both K 12 and higher education librarians archivists government officials researchers and academicians *Advanced Online Education and Training Technologies* Habib, Maki, 2018-08-30 Technology plays a vital role in bridging the digital divide and enhancing student learning both in and outside of the classroom This is possible thanks to the successful use of educational online technologies and other new teaching resources being integrated into learning environments Advanced Online Education and Training Technologies is an essential reference source that explores student and teacher learning through various online platforms Featuring research on topics such as professional development in the twenty first century and cultural differences in online learning environments this book is ideally designed for educators students academicians and other education professionals seeking coverage on enhanced student learning through technology based learning tools **Cyberwar** Kathleen Hall Jamieson, 2020 In Cyberwar Kathleen Hall Jamieson tackles the issue of Russian meddling in US elections She marshals the troll posts unique polling data analyses of how the press used the hacked content and a synthesis of half a century of media effects research to argue that it is probable that the Russians helped elect Donald Trump After detailing the ways in which the Russian efforts were abetted by the press social media platforms the candidates party leaders and a polarized public Cyberwar closes with a warning the country is ill prepared to prevent a sequel In this updated paperback edition Jamieson covers the many new developments that have come to light since the original publication **Proceedings of International Conference on Emerging Technologies and Intelligent Systems** Mostafa Al-Emran, Mohammed A. Al-Sharafi, Mohammed N. Al-Kabi, Khaled Shaalan, 2021-12-02 This book sheds light on the emerging research trends in intelligent systems and their applications It mainly focuses on four different themes including Artificial Intelligence and Soft Computing Information Security and Networking Medical Informatics and Advances in Information Systems Each chapter contributes to the aforementioned themes by discussing the recent design developments and modifications of intelligent

systems and their applications **Smart Systems and Wireless Communication** Rituparna Chaki,Agostino Cortesi,Suparna DasGupta,Soumyabrata Saha,2025-05-19 The volume is a collection of high quality research papers presented at International Conference on Smart Systems and Wireless Communication SSWC 2024 organized Department of Information Technology JIS College of Engineering Kalyani West Bengal India during 29 30 November 2024 This book focuses smart cities smart farming smart healthcare wireless networks communication internet of things cyber physical systems human computer interaction big data and data analytics high performance computing requirements engineering analysis and verification techniques security systems distributed systems biometrics bioinformatics robotic process automation and machine learning *Twittering the #ArabSpring?* Johannes Sieben,2012-12-12 Master s Thesis from the year 2012 in the subject Communications Multimedia Internet New Technologies grade 72% Distinction City University London School of Informatics and School of Arts and Social Sciences course MSc Information Communication and Society language English abstract This dissertation examines tweet content from key periods of the uprisings in Egypt and Syria of 2011 and 2012 generally known as the Arab Spring Some authors and the main stream media have suggested that these uprisings were significantly influenced and organised by Twitter and subsequently referred to them as Twitter Revolution Other authors have strongly opposed this idea and attributed it to self deception in the light of marvellous inventions of the Western World They have suggested Twitter was predominantly used as an information sharing network In an effort to contribute data to this debate this dissertation analyses tweet content from three different observation periods two tweet datasets were collected from other academics and third one was crawled from the Twitter API this process made use of the crawling tool cURL and the database software mongoDB The combined tweet dataset contained about 1 9 million tweets out of which a sample of 1945 tweets was drawn This sample was then evaluated in a quantitative content analysis according to a coding manual These codes were entered into the statistical analysis software SPSS in which they were also processed This study found that in the context of these uprisings Twitter was indeed used more as an information sharing tool and only to a relatively small fraction for organisational purposes This result does not negate the possibility of a mobilising effect of that small fraction A further central result is that almost every second tweet contained a hyperlink and that most of these lead to visual stimuli **The Governance of Artificial Intelligence in the “Autonomous City”** Federico Cugurullo,Tan Yigitcanlar,Xiaoling Zhang,Vincent J. Del Casino Jr.,Natalie Marie Gulsrud,Sarah Barns,2023-10-18 Artificial intelligence AI is now mediating and in some cases seen to be controlling key urban services and infrastructures thus becoming a prominent feature of the contemporary city As portrayed in recent studies the autonomous city can be understood as a city where urban artificial intelligences perform tasks and take on roles which have traditionally been the domain of humans At stake in these debates are questions related to the meaning and ongoing role of intelligence for both humans and machines While autonomous cars transport people service robots run shops drones deliver goods and city brains govern entire cities humans

are redefining the meaning of what smart means in the city and what role the human being may play in future urban spaces With humans shifted to new sectors of the economy or pushed aside by algorithms and robotic agents creating new ways of seeing and governing the city we raise the question as to whether or not cities are becoming more autonomous from human experience in the sense that their operation does not rely as much on human inputs anymore

A Comprehensive Approach on Sentiment Analysis & Prediction Manu Banga, 2023-01-23 Document in the subject Computer Sciences Artificial Intelligence language English abstract In today scenario there is abrupt usage of microblogging sites such as Twitter for sharing of feelings and emotions towards any current hot topic any product services or any event Such opinionated data needs to be leveraged effectively to get valuable insight from that data This research work focused on designing a comprehensive feature based Twitter Sentiment Analysis TSA framework using the supervised machine learning approach with integrated sophisticated negation handling approach and knowledge based Tweet Normalization System TNS We generated three real time twitter datasets using search operators such as Demonetization Lockdown and 9pm9minutes and also used one publically available benchmark dataset SemEval 2013 to assess the viability of our comprehensive feature based twitter sentiment analysis system on tweets We leveraged varieties of features such as lexicon based features pos based morphological ngrams negation and cluster based features to ascertain which classifier works well with which feature group We employed three state of the art classifiers including Support Vector Machine SVM Decision Tree Classifier DTC and Naive Bayesian NB for our twitter sentiment analysis framework We observed SVM to be the best performing classifier across all the twitter datasets except 9pm9minutes DTC turned out to be the best for this dataset Moreover our SVM model trained on the SemEval 2013 training dataset outperformed the winning team NRC Canada of SemEval 2013 task 2 in terms of macro averaged F1 score averaged on positive and negative classes only Though state of the art twitter sentiment analysis systems reported significant performance it is still challenging to deal with some critical aspects such as negation and tweet normalization
