

Hydronic Heating and Hot Water System

Your Touring Coach has a gas/electric hydronic heating and on-demand hot water system that runs on gasoline and an electric element, eliminating the need for LP gas. The system gets its fuel from the vehicle's gas tank.

NOTE

The system will automatically shut OFF if the Coach's fuel tank reaches the one-quarter level, leaving enough fuel to travel to a refilling station.

The heater portion of the system operates by circulating a heat transfer fluid (RV boiler antifreeze) through quiet air handlers that provide soft, radiant heat to warm the Coach's interior. When the Coach is cold, the fans run on high until the interior temperature reaches its target. The fans then automatically slow down to maintain comfort levels.

The water heater portion of the system circulates the same fluid through an instantaneous water heat exchanger, which produces hot water for showers and faucet use.

The Timberline touchscreen display (shown above) controls the system. When making selections, the display's various touch controls change from blue OFF to orange ON.

The controls allow you to adjust the heat and whether you want to utilize gasoline and/or electric:

- The **HEATER** icon controls the gasoline burner
- The **ELEMENT** icon controls the 1500W electric element that only functions when connected to shoreline power

See your Owner's Packet for a copy of the Timberline User Manual, where you will find detailed operation, maintenance, and troubleshooting instructions. Or, visit Timberline's website: <https://timberlineheat.com>

Heater and Water Heater Operation - Shore Power

When both the **HEATER** and **ELEMENT** icons are selected, the system automatically prioritizes using heat from the electric element. If there is greater heating demand on the system, the gasoline burner will automatically engage and heat the antifreeze for circulation.

The gasoline powered **HEATER** should only be operated when the vehicle is outside.

1. Select **ELEMENT** to activate the electric heating element (conserves fuel while connected to shoreline); and/or:
2. Select **HEATER** (prioritizes electric element and allows the system to engage the gasoline powered heater based on demand).
3. Select **ZONE 1** (bed area) or **ZONE 2** (all other areas) using the tabs at the bottom of the screen.
4. Select the **ON/OFF** icon to turn the heat on or off for the selected zone.
5. Use the sliders to adjust the system to your desired temperature for each zone. The top slider adjusts daytime temperatures. The lower slider sets nighttime temperatures. Times for day and night can be adjusted in the settings menu.

Water Heater Only Operation - Shore Power

1. Select **ELEMENT** to activate the electric heating element (conserves fuel while connected to shoreline); and/or:
2. Select **HEATER** (prioritizes electric element and allows the system to engage the gasoline powered heater based on demand).
