The Theory of Access Replacing Ownership on the Example of Spotify Marie Heimer, 2011 Bachelor Thesis from the year 2010 in the subject Business economics General grade 1.3 University of Popular Music and Music Business Popakademie Baden-Württemberg course Musikbusiness BWL language English abstract Although the recording industry finds itself in a challenging economic situation very little is known about how to build up a business model which fulfils the demands of a new generation The theory of access replacing ownership provides another perspective concerning the so-called digital natives The analysis of the demands of this consumer groups shows that the ownership of music seems to be obsolete to them The music consumers of today and tomorrow do no longer care about owning music The Swedish model Spotify offers music on an advertisement and subscription base and is depicted as an example in which consumers are offered a model of access The thesis results provide general information about the notion of property and ownership as a whole as well as it recovers the development of these notions on the digital age and their deep impact on the economic behaviour and the scope of dealing with these changes The thesis uses self-generated data from a survey as well as literary sources and serves as a road sign indicating the issues of access in several parts of economy with the focus on Spotify and the recording industry The findings of the thesis can be generalised to any industry that offers digital entertainment content

Discounted Cash Flow Valuation of Spotify Olaya Gesteira, 2020-04-07 Master's Thesis from the year 2019 in the subject Business economics Investment and Finance University of Lodz LODZ UNIVERSITY OF TECHNOLOGY language English abstract This work contains a theoretical model that describes one of the many possible future outcomes of Spotify as an investment The author attempts to measure the value of the digital platform using a DCF

valuation model The work begins with the basic theoretical requirements of a DCF model Then Spotify s company history market environment and business model will be studied Afterwards the author s assumptions and expectations in regard to the company s future financial performance will be explained The fourth chapter contains the empirical discounted cash flow valuation model Moreover the work deals with discounted cash flow valuation concepts of growth reinvestment and risk and different approaches towards them Spotify s history mission vision and values will be analyzed afterwards The next chapter outlines the assumptions driving revenue growth and reinvestment and compiles the main operational and strategical risks the company faces The work concludes with an explanation of the actual application of the discounted cash flow model

Business economics Accounting and Taxes grade 1 3 University of applied sciences Frankfurt a M FOM language English abstract The beginning of the digital revolution at the turn of the millennium has ushered in a structural change in many sectors Due to the increased use of modern information and communication technologies ICT several sectors have already experienced existential economic implications This is especially evident in the music media and publishing industries For example music is not only purchased on CDs from local retail stores but is also increasingly consumed via the Internet through streaming services such as Spotify Videos store rentals compete with the comfortable video on demand services available in customers own homes The Internet as a medium for information and consumption for products and services has established itself as a faster more comfortable and more efficient channel in comparison to traditional sales channels Stationary retail stores were also not spared from digital disruption The market research institute Gesellschaft f r Konsumforschung GfK predicts a doubling of the online share of retail sales from currently to 20% by the year 2025 At the same time new and innovative market participants known as financial technology or FinTech companies are edging into the financial sector and trying to gain market share from established banks through customer friendly products and services Nevertheless the banks do not seem to recognize the seriousness of the situation and therefore are reluctant to adapt to the new situation However experience has shown that ignorance of an industry s digitization has already led to the fall of large

and established companies As a well known example in the technology industry Kodak is often referred to in this context The company's reaction to the digital disruption took place too late whereas other companies had already recognized the trend towards digital photography at an earlier stage and prepared corresponding products As a result Kodak plummeted from the top of the photography technology industry Evidence of ongoing digital disruption of the financial services sector has already been provided in the form of a new type of bank the direct bank which was first introduced in the early 1990s FinTech companies seek to take advantage of this success and gain customers and market share by offering innovative solutions for financial products and services
