Committee, 2014      *Mining Herald and Colliery Engineer* ,1896      *Untangling the USA* Etienne Deffarges, 2018-06-14 Tom  
Brady and the tuck rule Nobody knew health care could be so complicated The financial world has become way too  
complicated and very secretive What could Tom Brady Donald Trump and Michael Lewis possibly have in common  
Complexity Lewis has analyzed it Trump has discovered it Brady has benefited from it And the USA is entangled in it  
Complex systems are an inevitable part of business and socio economic structures We reach a breaking point however when  
social and organizational structures become cumbersome and unintelligible Entire new systems need to be constructed just  
to manage this complexity with questionable or negative value to society at large The outcome is high costs poor results  
deepening social inequality and the erosion of public trust Wholesale changes must be contemplated This is particularly true  
in the USA today where complexity is piled upon complexity in a number of critical sectors such as health care energy  
finance and government The author takes a common sense broad based and analytical approach to some of the most  
complicated issues facing the US today He examines the costs of complexity through a wide angle lens provides analysis of  
the root causes involved and explains what is necessary to improve results and lower costs The ever increasing level of  
complexity in the US is compared to that in other developed economies History is referenced as a guide to show that in many  
areas America s success has relied on simple and elegant solutions These contrasting paths are used to propose alternative  
approaches and new solutions Beyond analyzing how incredibly complex socio economic systems have emerged in recent  
years in the US the author steps back reflects on the fundamental values of this country and offers a number of actionable  
proposals to improve the lives of all American citizens Etienne Deffarges has enjoyed a successful career first as a senior  
strategy consultant to many leading global companies then as a health care technology entrepreneur in the US He is perfectly  
positioned to observe how complex systems are stifling socio economic progress He brings a unique insider view of the issues  
involved and examines a number of key sectors that impact American society at large including health care energy finance  
regulations taxation utilities and welfare      **Electrical World** ,1890      The Electrical World and Engineer ,1900
