Market and Sales Strategy** Erik Somssich,2017-04-03 Seminar paper from the year 2016 in the subject Business economics Offline Marketing and Online Marketing grade 1 3 University of applied sciences Cologne language English abstract The purpose of this assignment was to analyze the market and sales strategy of Tesla and to identify its Model 3 customers After ten years of waiting Tesla s CEO Elon Musk has presented Tesla Model 3 to the public for the first time in an evening show at the end of march 2016 Unveiled at the company s design studio in Hawthorne California in front of a crowd of whooping and cheering customers and journalists Model 3 is the most affordable Tesla so far hoped to bring electric cars to the mass market Musk stated that the car will deliver at least 215 miles of range beginning at just 35 000 dollar Musk is fairly confident that deliveries will begin by the end of 2017 and you will not be able to buy a better car for 35 000 dollar even with no options Also it will be one of the safest cars in the world according to Musk Even before Tesla unveiled its new middle class model there were more than 115 000 people who had paid already 1 000 dollar to reserve one of the highly anticipated electric cars These early buyers didn t know what the car would look like or that it would have a starting price of exactly 35 000 dollar They also didn t know how long the production and delivery would take

New Jersey Register ,2014 Ludicrous Edward Niedermeyer,2019-08-20 Tesla is the most exciting car company in a generation but can it live up to the hype Tesla Motors and CEO Elon Musk have become household names shaking up the staid auto industry by creating a set of innovative electric vehicles that have wowed the marketplace and defied conventional wisdom The company s market valuation now rivals that of long established automakers and to many industry observers Tesla is defining the future of the industry But behind the hype Tesla has some serious deficiencies that raise questions about its sky high valuation and even its ultimate survival Tesla s commitment to innovation has led it to reject the careful zero defects approach of other car manufacturers even as it struggles to mass produce cars reliably and with minimal defects While most car manufacturers struggle with the razor thin margins of mid priced sedans Tesla s strategy requires that the Model 3 finally bring it to profitability even as the high priced Roadster and Model S both lost money And Tesla s approach of

continually focusing on the future even as commitments and deadlines are repeatedly missed may ultimately test the patience of all but its most devoted fans In Ludicrous journalist and auto industry analyst Edward Niedermeyer lays bare the disconnect between the popular perception of Tesla and the day to day realities of the company and the cars it produces Blending original reporting and never before published insider accounts with savvy industry analysis Niedermeyer tells the story of Tesla as it's never been told before with clear eyes objectivity and insight
