[Television on Demand](#) MJ Robinson, 2017-06-01

Since 2010, curation has become a marketing buzzword. Wrenched from its traditional home in the world of high art, everything from food to bed linens to dog toys now finds itself subject to this formerly rarified activity. Most of the time, the term curation is being inaccurately used to refer to the democratization of choice, an inevitable development and side effect of the economics of long tail distribution. However, as any true curator will tell you, curation is so much more than choosing; it relies upon human intelligence, agency, evaluation and carefully considered criteria. An accurate if utopian definition of the much abused and overused term *Television on Demand* examines what happens when curation becomes the primary way in which media users or viewers engage with mass media such as journalism, music, cinema and most specifically television. Mass media's economic model is based on mass audiences, not a cornucopia of endless options from which individuals can customize their intake. The rise of a curatorial culture where viewers create their own entertainment packages and select from a buffet of viewing options and venues has caused a seismic shift for the post network television industry, one whose ultimate effects and outcomes remain unknown. Curatorial culture is a revolutionary new consumption ecology, one that the post network television producers and distributors have not yet figured out how to monetize as they remain in what anthropologists call a liminal state of a rite of passage: no longer what they used to be but not yet what they will become. How does an advertiser-supported medium find leave alone quantify viewers who DVR *This is Us* but fast forward through the commercials, have a season pass to *The Walking Dead* via iTunes, to
