## **Visual Information For Everyday Use**

Harms Zwaga, T. Boersema, H.

Hoonhout, 2003-09-02 Creating graphical communication for public use represents both a large industry and a fertile area for thoughtful and innovative research and development. In this collection some of the world's figures within the interdisciplinary field of public graphics have been brought together to share their wisdom and present a look at this exciting world. This text is divided into a number of sections representing the rich diversity of concerns embraced by visual information designers. The first section is devoted to these foundational issues before moving on to particular domains of interest within public graphics: user instructions, warnings, forms, tables and graphs, maps and plans, wayfinding, information and graphic symbols. This book is designed as a companion for anyone concerned with visual information design, particularly in the context of everyday use. Contributions are included from ergonomists, psychologists, commercial designers and health and safety professionals. The audience reflects these contributions and is pitched at a level which allows it to provide both practical guidelines and a rigorous academic understanding of the field.

## **The Application of Hydraulic and Sediment Transport Models in Fluvial Geomorphology**

Artur Radecki-Pawlak, Tomáš Galia, 2020-12-10 After publishing the famous Fluvial Processes in Geomorphology in the early 1960s, the work of Luna Leopold, Gordon Wolman and John Miller became a key for opening the door to understanding rivers and streams. They first illustrated the problem to geomorphologists and geographers. Later Chang in his Fluvial Processes in River Engineering provided a basis for engineers showing this group of professionals how to deal with rivers and how to understand them. Since then more informative studies have been published. Many of the authors started to combine fluvial geomorphology knowledge and river engineering needs such as Tools in Fluvial Geomorphology by G. Mathias Kondolf and Hervé Piégay or focused more on river engineering tasks such as Stream Restoration in Dynamic Fluvial Systems: Scientific Approaches by Andrew Simon, Sean Bennett and Janine Castro. Finally, Luna Leopold summarized river and stream morphologies in the beautiful A view of the river. It appears that we continue to explore this subject in the right direction. We better understand rivers and streams and as engineers and fluvial geomorphologists we can establish tools to help bring rivers alive. However, there is still a hunger for more scientific tools that we could use to further understand rivers and to support the development of healthy streams and rivers with high biodiversity in the present world which has started to face water scarcity.
