Hogenson,2017-05-23 As the nations of the Caribbean respond to and prepare for climate change tourism has the potential to both worsen and mitigate these effects In this book we look at marine tourism and its connection with ocean health fisheries and critical ecosystems including coral reefs We consider the role that marine protected areas can play in preserving reefs and other ecosystems leading to greater resilience in the face of climate change Finally we look at how the tourism industry is responding to the threat of climate change using its economic and social capital to foster positive change in the Caribbean and other parts of the world While the situation is clearly urgent we hope this volume provides readers with some optimism as well as tangible ideas for using tourism to help mitigate the impending effects of climate change on marine ecosystems and economies

Climate Change and the

Role of Education Walter Leal Filho, Sarah L. Hemstock, 2019-11-28 This book offers insights into the educational

dimensions of climate change and promotes measures to improve education in this context It is widely believed that education can play a key role in finding global solutions to many problems related to climate change Indeed education as a process not only helps young people to better understand and address the impact of global warming but also fosters better attitudes and behaviours to aid efforts towards mitigating climate change and adapting to a changing environment But despite the central importance of education in relation to climate change there is a paucity of publications on this theme

Against this background the book focuses on the educational aspects of climate change and showcases examples of research projects and other initiatives aimed at educating various audiences It also provides a platform for reflections on the role education can play in fostering awareness on a changing climate Presenting a wide range of valuable lessons learned which can be adapted and replicated elsewhere the book appeals to educators and practitioners alike
